Message from the Chairman of the Board of Directors

Dear Shareholders and Stakeholders,

The market conditions of rubber gloves after the coronavirus epidemic (Covid-19) still faces fierce price competition and over-inventory, despite signs that inventory is likely to decline. Such circumstances affect direct to Shun Thai Rubber Gloves Industry Public Company Limited. In order to maintain competitiveness, the Company has adjusted its strategy in terms of management; production , marketing and prices in line with market demand and keep up with the changing situation at a satisfactory level.

In the situation, the country's economy is in a state of slowing down. Financial costs have risen due to interest rate hikes, energy costs, and raw material costs used in the production process have also risen. Meanwhile, the baht remains volatile. These factors severely affect the rubber glove manufacturing business operators, which the Board of Directors has closely monitored and assessed the situation. In addition, the Company has advised the management and management of the Company to adjust the Company's strategy accordingly and keep up with the situation that has arisen. There must be control and supervision for all parties to use the budget in the most efficient and effective manner to reduce costs. Increase revenue and create competitive opportunities for the Company under good and appropriate internal control and risk management systems, as well as raise the level of governance standards in accordance with official requirements and international standards.

On this occasion, I would like to thank all sectors for their continued support and trust in the Company. All the Company's Directors and I are determined to lead Shun Thai Rubber Gloves Industry Public Company Limited to overcome the crises, problems and obstacles that arise with full force and to the best of our ability to aim for the Company to grow steadily forward.

Best regards

A handwritten signature in blue ink, consisting of a stylized 'C' followed by a series of loops and a long horizontal stroke extending to the right.

(Mr. Chakarn Saengruksawong)

Chairman of the Board of Directors

Part 1

Business and Operations

1. Structures and Operations of the Group

1.1 Policy and Overview of Business Operationso

Shun Thai Rubber Gloves Industry Public Company Limited had started business since 1988 and registered as a public company limited on September 4, 2001, conducting business of manufacturing, distribution and export of rubber gloves, classifying into 3 types, consisting of:

(1) Medical Glove, classifying into 2 subtypes:

- Surgical Glove: It is used for surgery. This glove has thin texture with strength, durability and length to elbow. It must be treated by sterilization 100% using gamma irradiation. For its packaging, it has refinement and convenience for using. This glove is a disposable glove for protecting from pathogen.

- Examination Glove: It is for general medical examination, possessing both Powdered and Powder free gloves. This glove shall be designed to be appropriate to the use, namely, it shall be wear easily and easy to open its package. This glove will not have left or right side. It is designed to be Ambidextrous (can wear both side of it). This glove is thin, fits for hands. It is short at wrist and cheap. This glove is a disposable glove for protecting pathogen transmission.

(2) Household Glove has a large size. It is durable and resisted for using that shall expose to water or detergent with long lifetime. Its design is emphasized to be beautiful appearance, easy to wear, soft lining and packed finely in order to attract the maid's interest.

(3) Industrial Glove for general use. It is used for packing which is unnecessary to be beautiful appearance. This glove is suitable for using in industrial factory such as food preservation industry or instant food production, etc.

“There is efficient production process, modern management system, eco-freindly and -community, build sustainable growth to all sectors of Stakeholders and produce variety products and standardized, emphasizing on effectiveness of production and marketing, and continuous development of Value Chain.”

1.1.2 Key Changes and Development

Shun Thai Rubber Gloves Industry Public Company Limited had been registered establishment on May 24, 1988 with initial registered capital of 30 million baht.

- **1998**

The Company had joint business with B Mark Company Limited, Italy to establish B Mark Shun Thai Company Limited in Italy to be a dealer of rubber gloves of the Company to customer in Italy and Europe, holding shares of 40 percent (amount of 46,920 shares).

The Company had increased the paid-up registered capital as 75 million baht in 1999 and increased paid-up registered capital as 125 million baht in 2000 in order to support the Company’s growth and had started to constrcut the 2nd factory.

- **2001**

The Company had registered as a public company on September 4, 2001 and changed par value from 10 baht to 1 baht per share.

Later, the Ordinary General Meeting of Shareholders No. 7/2544 on December 28, 2001 had resolution to increase the registered capital as 195 million baht, issuing 70 million shares of the common stock which is issuance and offer for sale to Private Placement (PP) of 20 million shares at price of 1 baht per share, the remaining 50 million shares is offer for sale to general public at price of 1.80 baht per share.

- **2002**

It is the important year of the Company because of the Company had offer for sale of shares to general public at the first time and at the same year, the Company's shares had been listed as the registered security in stock exchange MAI, which opened to trade on August 1, 2002 using stock trading acronyms as "STHAI".

- **2003**

The Company had invested in shares of S.T. Med Company Limited, an associate, established as the company limited in United States of America in order to be a product dealer in United States of America and Americas by the Company holds 19 percent of shares (amount of 95,000 shares).

And increase the registered capital from 195 million baht to 260 million baht, issuing 65 million new ordinary shares by allocated to existing shareholders in ratios of 3 previous shares per 1 new share at price of 1 baht per share as per the resolution of Extraordinary Meeting of Shareholders No. 1/2546 on July 31, 2003.

The said capital increase causes the Company has the paid-up capital exceeding 200 million baht. Stock Exchange of Thailand therefore transferred the Company's securities which are the registered securities in MAI to be the registered securities in SET by trading in Pharmaceutical Products & Cosmetics using acronyms as "STHAI" as before. It became effective in security trade system since January 1, 2004 which is the beginning date of accounting period.

- **2004**

The Company had invested in ordinary shares in Latex Systems Company Limited, a company manufactured and distributed latex mattress by the Company holds 5.77 percent of shares (amount of 80,000 shares).

- **2006**

The Company had issued the warrants to purchase ordinary shares allocated to existing shareholders No. 1 (STHAI-W1) and allocated to board of directors and employees of the Company No. 1 (ESOP-W1) of 195,000,000 units and 15,000,000 units, respectively, with term of 3 years and the first conversion to ordinary

shares on September 29, 2006, which exercise ratio as per the warrant of 1 unit per 1 ordinary share at price of 2 baht per share.

- **2008**

The Company had increased the registered capital of the Company of 102,657,633 baht from previous registered capital of 600,000,000 baht to the registered capital of 702,657,633 baht, issuing 102,657,633 new ordinary shares with par value of 1 baht per share, which offered for sale to existing shareholders in ratios of 4 previous shares per 1 new share at price of 1.70 baht per share.

Later, 76,092,793 shares remaining from increasing the capital were allocated to distribute as the 2nd time to offer for sale to existing shareholders in ratios of 5 previous shares per 1 new share at price of 1.70 baht. Moreover, there were those who exercised the subscription rights of 62,198,000 shares, accounting for amount of 105,736,600 baht, which the remaining shares of 13,894,793 shares.

And there is investment sale of S.T.MED Company Limited and B Mark Shun Thai Company Limited, which are associates, holding 19 percent and 40 percent of shares, respectively by 95,000 Shares of S.T.MED Company Limited were sold on July 4, 2008 to outsiders at price of 10,000 US Dollars.

- **2009**

The Company had exercised the final right of conversion of warrant to purchase ordinary shares of the Company allocated to existing shareholders No.1 (STHAI-W1) and allocated to board of directors and employees of the Company No. 1 (ESOP-W1), commencing to exercise the first right on 2006 and expiring on 2009 with person who exercised the rights of 60,000 shares, resultign in the Company had paid-up registered capital of 499,453,373 baht and regstered capital of 702,657,633 baht.

The Board of Directors Meeting No. 3/2552 on August 11, 2009 had resolution to sell investment in Latex Systems Company Limited which operates business of manufacturing and distrbution of latex mattress, holding 5.77 percent of shares (amount of 80,000 shares) to Thai Rubber Latex Corporation Thailand PCL with amount of 739,200 baht in December 2009.

The Company had sold investment in B Mark Shun Thai Company Limited, an associate in Italy which is responsible for a dealer of rubber gloves in Italy and Europe, holding 40 percent of shares (amount of 46,920 shares). The said investment sale met the resolution of Board of Directors Meeting No. 4/2551 on June 10, มิถุนายน 2551, selling to outsider at price of 40,000 US Dollars and ealready had transferred the ownship un May 2010.

- **2010**

The Ordinary Meeting of Shareholders No. 1/2553 on April 9, 2010 had resolution to reduce the registered capital by writing off the registered shares remaining from supporting the capital increase in proportion and exercise of subscription right of warrant to purchase ordinary shares of the Company.

The Company had 13,894,793 unsold shares from supporting the capital increase in proportion and 189,309,467 ordinary shares remaining from supporting exercise of exercise of warrant conversion, resulting in the Company had total 203,204,260 unsold ordinary shares with registered capital of 702,657,633 baht and paid-up registered capital of 499,453,373 baht.

Therefore, when already write-off the registered capital as per resolution of Ordinary Meeting of Shareholders No. 1/2553, the Company had the paid-up registered capital of 499,453,373 baht.

In addition, the Ordinary Meeting of Shareholders No. 1/2553 had resolution to amend Clause 4 of the Company's memorandum of association regarding the Company's registered capital to correspond to the reduced registered capital which the Company already had amended it with Ministry of Commerce.

- **2012**

The Company had administration policy emphasizing the work quality improvement and expansion of customer group to increase the sales, reduce the cost and intend to make a profit in order to the Company's financial status becomes strong and be able to return profits to shareholders in the future.

- **2013**

The Annual Ordinary Meeting of Shareholders 2556 had resolution to increase the Company's registered capital from former capital of 499,453,373 baht to the registered capital of 998,906,746 baht, issuing 499,453,373 new ordinary shares, at price of 1 baht per share by offer for sale to existing shareholders in rate of 1 former ordinary shares per 1 new ordinary shares at price of 0.25 baht per share. After distribution of the said common stocks, the Company had the paid-up registered capital of 998,906,746 baht and ordinary share discount of 270.90 million baht due to capital increase is lower than the Par Value.

- **2014**

The Ordinary Meeting of Shareholders No. 1/2557 on December 29, 2014 had resolution to increase the Company's registered capital from former ordinary shares of 998,906,746 baht to new ordinary shares of 3,995,626,984 baht, issuing 2,996,720,238 new ordinary shares with par value of 1 baht per share through offer for sale to existing shareholders in ratios of 1 former ordinary share per 3 new ordinary shares at price of

0.10 baht per share by paid on February 11-13, 16-17, 2015. However, the Company received money from the capital increase of 299,672,023.80 baht. After the said operations, there was no shares remaining from the allocation.

In addition, it also had resolution to approve business potential development plan as informed to stock exchange.

- **2015**

In June 2015, the Company had hold the Extraordinary Meeting of Shareholders No. 2/2558 on Tuesday, June 9, 2015 with resolution to increase the Company's registered capital from former capital of 3,995,626,984 baht to the registered capital of 19,978,134,920 baht by issuing 15,982,507,936 new ordinary shares splitting into offer for sale of common stock of 11,986,880,952 shares per existing shareholders of the Company as per the Rights Offering, splitting into 2 payments and allocating the common stock not exceeding 3,995,626,984 shares to support exercise of rights as per the warrant to purchase ordinary share No. 2 (STHAI-W2) issued for existing shareholders after the Company already had increased the capital and paid both payments.

In August 2015, the Board of Directors Meeting No. 12/2558 on August 18, 2015 had resolution to approve the Company to purchase ordinary shares of Northern Renewable Energy Company Limited ("NRE") with main objectives of business operations of comprehensive production and distribution of biomass energy, production of electricity from biomass and waste by purchase 3,136,000 ordinary shares with par value of 100 baht per share, accounting for 48.25 percent of paid-up registered capital of NRE at price of 100 baht per share, totaling 313,600,000 baht from 21 existing shareholders of NRE which were not involve with the Company. After the said transactions, the Company hold the ordinary shares in NRE, accounting for totally 48.25 percent.

- **2016**

Board of Directors Meeting No. 10/2559 on May 19, 2016 had resolution to purchase common stock of NRE as per the former Rights Offering which the Company hold in ratios of 48.25 percent of registered capital by purchased 1,688,750 shares at price of 100.00 baht per share, accounting for total paid-up share price of 168.88 million baht.

- **2017**

Board of Directors Meeting No. 2/2560 on February 14, 2017 had resolution to reduce proportion of investment in NRE by selling 2.43 million shares of NRE with amount of 243 million baht by Mr. Phatchari Nitsiriphat as a representative offer to the board of directors meeting.

Board of Directors Meeting No. 2/2560 on February 14, 2017 had resolution to reduce size of power plant of the project from 9.9 MW to 3 MW.

- **2018**

As per the Board of Directors Meeting No. 2/2561 on January 26, 2018 had notified the changes of directors and authority of board of directors by approving resignation of chairman of board of directors and auditor / independent director, totaling 2 persons.

Later, in February 2018, Board of Directors Meeting No. 4/2561 on February 14, 2018 had notified additional changes of directors and authority of board of directors by approving resignation of a director/chief executive officer, and approving appointment of a new director substitute for the resigned director and change of 3 positions in board of directors.

On September 3, 2018, Shun Thai Rubber Gloves Industry Public Company Limited had clarified to stock exchange regarding submission of annual financial statement 2017 which auditor from ANA Audit Company Limited did not express opinion to the Company's financial statement because of limitation under criteria of significant unexpression of opinion.

The said action affected and was very important to financial statement, auditor of Shun Thai Rubber Gloves Industry Public Company Limited therefore was unable to express opinion to the financial statement.

Because of Shun Thai Rubber Gloves Industry Public Company Limited had additional invested in NRE in 2017 and paid for the increased capital of 168,875,000 baht on May 30, 2017. Later, it was found that other shareholders of NRE did not pay for the said common stock to NRE anyway, Shun Thai Rubber Gloves Industry Public Company Limited therefore asked NRE to refund the increased capital amount of 168,875,000 baht to Shun Thai Rubber Gloves Industry Public Company Limited by submitting the Letter No. Inv-Out 031/2561 dated August 30, 2018 to Northern Renewable Energy Company Limited to request to refund the increased capital because of the capital increase of the Company in NRE was incompleted and the Company had notified stock exchange on September 5, 2018.

During the 1st quarter of 2018, there was change of directors and executives, replanning a new operation plan in organization, planing to reduce manufacturing cost and improving the efficiency of machines in order to have better productivity and quality.

Sale Department had planned to increase the sales in powder market in order to correspond to global market's direction with utilization rate of powder gloves decreased continuously due to problem of starch protein allergy.

Outcomes of control and improvement of this work plan result in manufacturing cost in 2018 decreases and the Company's performance had gross profit.

● **2019**

As per the Company was unable to submit the annual financial statement 2018 under the due date, it was from Northern Renewable Energy Company Limited, the associate, was unable to submit the final annual financial statement 2017, resulting in the Company was unable to know the performance of Northern Renewable Energy Company Limited in annual financial statement 2017.

The Company, as the majority shareholders of Northern Renewable Energy Company Limited, therefore was necessary to proceed all respects in order to the Company solves the said situation.

The Company by virtue of Section 1173 and 1174 of Civil and Commercial Code therefore invited shareholders to attend the Extraordinary Meeting of Shareholders No. Special / 2562 of the Company on Thursday, November 7, 2019 at 10.00 a.m. at the Meeting Room of Shun Thai Rubber Gloves Industry Public Company Limited, No. 1, Promphan Tower 2, Room No. 608, the 6th Floor, Latphrao Soi 3, Chomphon Sub-district, Chatuchak District, Bangkok, which on the meeting date of the said Extraordinary Meeting of Shareholders No. Special / 2562, the meeting had considered and approved agenda as follows:

Agenda Item 5: Consider to prosecute civil and/or criminal case to director and/or any other person related to registration of capital increase of the Company from 650,000,000 baht to 1,000,000,000 baht on May 19, 2016 that may be illegal and offenses under the Determining Offence Relating to Registered Partnership, Limited Partnership, Limited Company, Association and Foundation Act B.E. 2499 (1956) as mentioned above.

Resolution: The Meeting had resolution with majority vote to prosecute civil and/or criminal case to director and/or any other relevant person.

Later, on November 19, 2019, a new group of directors that had been appointed from shareholders of NRE had submitted the said request for registration to change director and director's authority of NRE to registrar of Department of Business Development which the said submission of request for registration is the case of the director, applicant, unnamed as per the Company's certificate, therefore, registrar also shall submit the said request for registration to former shareholders and directors of NRE that they will agree or protest any aspect or not.

It was appeared that during December 6-9, 2019, there were 4 shareholders and former directors of NRE protested the said registration to the registrar.

New directors of NRE already had prepared clarification of registration protest to submit to the registrar of Bangkok Office of the Central Company and Partnership Registration. After this, the registrar of Bangkok Office of the Central Company and Partnership Registration would further have an order in the said issue.

● 2020

The Company had proceeded from previous action by the registrar of Bangkok Office of the Central Company and Partnership Registration already had considered the request for registration to change numbers and authority of directors of NRE and had the order to accept the said registration on January 28, 2020.

The Ordinary Meeting of Shareholders on June 26, 2020 has resolution to approve:

1. Reduction of unpaid registered capital of the Company from 19,978,103,486 shares at par value of 1 baht per share, amount of 19,978,103,486 baht to 15,982,476,502 shares at par value of 1 baht, amount of 15,982,476,502 baht, and approve amendment of memorandum of association of the Company to correspond to the said reduction of registered capital. - Surgical Glove: For using in surgery. It has thin texture, durability and length up to elbow, treated by sterilization 100%. It is a disposal glove for single; and
- Examination Glove: For using in medical examination. It has thin texture, fits to hand, length at wrist level. This glove will not have left or right side. It is designed to be Ambidextrous and disposal glove for single use without reuse. The examination glove consists of powder natural rubber glove, powder free natural rubber glove and nitrile rubber glove.

B. Industrial Glove has resistance to work in industrial factory and to chemical substance. It has cleanliness and is able to expose to food and electronic workpiece.

C. Household Glove is a rubber glove that maid uses for cleaning and washing. It has thick texture, durability for use, long lifetime and comfort to wear.

However, the Company has manufactured both in manners of Original Equipment Manufacturer (OEM) and Original Brand Manufacturer (OBM), consisting of Pure Glove, Royal Guard and Sunshine Brands.

Standards of products are international standards which the Company had taken to be guidelines and reference for manufacturing rubber gloves to sell to customer. The Company's rubber gloves receive certification of product standards and product quality test, referencing standards as follows:

No.	Product Standards	Descriptions
1	TISI. 538-2560 Received the license on December 23, 2020	Industrial product standard for disposal sterile rubber surgical glove
2	TISI. 1056-2556 Received the license on January 26, 2021	Industrial product standard for disposal examination glove
3	TISI. 2505-2553 Received the license on September 9, 2013	Industrial product standard for food industry rubber glove
4	Protective Gloves acc.EN ISO 374-1:2016+A1	Standard for Protective Gloves (Europe)
5	510K Certificate FDA (Food Drug administration)	Standard for Examination and Surgical Gloves (United State of America)
6	EN455 Standard	Standard for Examination and Surgical Gloves (Europe)
7	ASTM D3577, ASTM D3578, ASTM D 6319	Standard for Examination and Surgical Gloves (United State of America)
8	ISO 11193, ISO 10282	Standard for Examination and Surgical Gloves (International)

In addition, the Company receives factory standards certified from external institutes and gets the reward of Good Performance Exporter of Thailand from Thai government, resulting in the Company receives the right of ranking good exporter from The Revenue Department with details as follows:

No.	Standards that Factory Received	Received Year	Certifier
1	Quality Management System - ISO 9001: 2015	2006	BSI
2	Quality Management System - ISO 13485: 2016 & EN ISO 13485: 2016	2009	BSI
3	510K Certificate FDA (Food Drug Administration)	1989	USFDA (U.S. Food and Drug Administration)

(2) Marketing and Competition

(A) Marketing Policies of Major Products or Services

The company has formulated a marketing plan to determine the buyer group or target group, which is considered an important factor in increasing sales for the company. The company is looking for a specific group of customers who have the purchasing power of high-priced gloves with more special characteristics, whether from the existing customer base, both foreign and domestic customers, and finding new customers. together with maintaining the existing market with the proportion of sales divided by domestic and foreign markets as the following table

Income proportion (%)	Year 2563	Year 2564	Year 2565	ปี 2566
International Customer	38	34	61	59
Domestic customer	62	66	39	41
total	100	100	100	100

Marketing Strategies

- The Company had a policy emphasized to expand marketing base by the Company focuses on expansion of product market that the Company has potential to manufacture and gives high yield such as Power Free Rubber Natural Medical and Nitrile Gloves, and Household Glove, manufacturing under quality requirements in standard criteria and to be suitable for production line of the Company.
- The Company has distribution via vareity of channels including via mediums such as trader, broker and direct sale to large user group such as hospital, industrial factory, etc. both domestic and foreign.
- For pricing, the Company will take account into material cost, foreign exchange rate, oder quantity and proportion of glove sizes per order list, and compare the glove prices of competitors in the market to be a criteria for determining the sale price.

B. Competition Conditions in Industry

Domestic Market Conditions

The demand for rubber gloves within the country has decreased in demand due to the sluggish market all over the world. In addition, there are many new rubber glove factories in the country. This gives traders quite a lot of options when buying latex gloves. This results in high competition in the market. Due to the stagnation of latex gloves, many factories have closed. The factories that remained were also trying to reduce the price of gloves to get more orders.

International Market Conditions

The demand for rubber gloves in overseas has decreased in demand due to the sluggish market of rubber gloves all over the world. In addition, there are many new rubber glove factories abroad. Especially in countries with high purchasing power like China which able to produces as many nitrile gloves as Malaysia and now has become one of top exporters. And since India is the second most populous country in the world, customers have more options to buy gloves from other countries and the market share is even higher than ever.

The Competition of the Rubber Glove Industry

Thailand is one of the main countries with a net production and export base in rubber glove products in the world. In 2022, Thailand accounted for more than 11% of the total value of rubber gloves exports. COVID-19 has caused the latex glove market to compete for a share in the global market. Especially a new manufacturer of latex gloves like China. It competed for market share until it was able to overtake Thailand in the top spot. 2nd in the world after Malaysia, making it highly competitive in terms of price and quality of gloves.

As for the overall latex glove market, in 2023, it was found to be in an oversupply state and prices fell considerably. The demand for rubber gloves domestic and abroad has eased. In addition, the market is also under pressure from competition in the price of gloves, whether from foreign countries or the domestic market, which reflects that the Thai latex glove business is facing a much higher production capacity than demand.

Chart of Estimation of Market Share of Rubber Glove Manufacturer By Manufacturer's Countries in 2022

Supply of Rubber Glove Industry

1) Government Policy for Promotion of Rubber Glove Manufacturing and Export

For Thailand, government sector focuses on stimulus of domestic latex use and building a mechanism for stability on price and sustainability of domestic rubber tree plantation. The said policy is a policy supported rubber glove manufacturing and export industry. Government sector therefore issues a policy for promotion of rubber glove manufacturing and export in order to stimulate economy and rubber glove export to be able to compete with exporter from other countries.

2) Sufficiency and Price of Raw Materials

Sufficiency and price of raw materials used in manufacturing rubber gloves are key factors affected to rubber glove supply and competitiveness of global rubber glove manufacturer. Main raw materials used for manufacturing rubber gloves such as concentrated latex for manufacturing natural rubber gloves and synthetic latex for manufacturing nitrile glove.

(3) Procurement of Products and Services

Manufacturing Rubber Gloves

Currently, the Company has 2 rubber glove manufacturing factories and total 15 sets of machines for manufacturing rubber gloves, dividing as follows:

- Factory 1 has 7 sets of rubber glove production line (Set No. 1 – 7)
- Factory 2 has 8 sets of rubber glove production line (Set No. 8 – 15)

Procurement of Raw Materials and Raw Material Distributor

The Company had purchased concentrated latex from concentrated latex producer in Rayong, Chon Buri and provinces in southern part such as Surat Thani, etc. by it is domestic concentrated latex purchase totally which the Company has focused on quality of concentrated latex of each distributor. For synthetic latex, it is purchased from domestic and other countries to support the manufacturing.

The Company's policy of concentrated latex purchase will select distributor distributed the best quality latex and offered the most appropriated price as well as provided longer credit payment. For purchase price of latex will be under the market price at that time and there is comparison of quotations from at least 3 distributors at the same period of time and compare the estimated price with Rubber Authority of Thailand

Price comparison table for 60% latex from 2019 – 2023 (unit Baht/Kg.)

Price (Baht/Kg.)	2019	2020	2021	2022	2023
Actual Averagee	32.29	31.73	43.30	43.39	36.33
Rubber Authority of Thailand	35.69	36.93	43.72	44.58	38.81

In the past, the company was able to procure concentrated latex at an average price lower than the Rubber Authority of Thailand.

(4) Assets used in business operations

In 2023 and 2022, total assets were 1,106.20 million baht and 1,268.95 million baht, respectively, with the majority of assets comprising cash, fixed assets, trade inventories and accounts receivable, and investment properties.

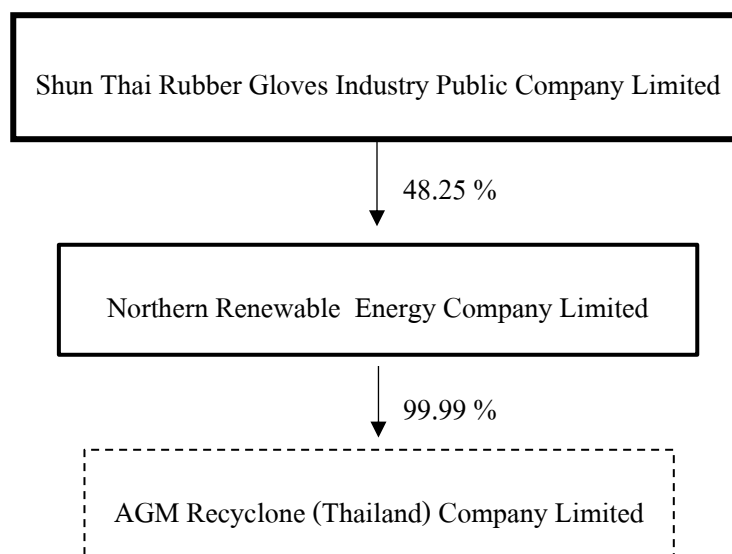

In 2023, the Company's cash or cash equivalent, net amounted to 268.21 million baht. There is land, Plant and equipment for the business of manufacturing rubber gloves net 405.84 million baht The details are as follows:

Key characteristics of fixed assets used by the Company in business operations as of December 31, 2023

2.1.6 Risk Management Committee and executives audit, monitor and evaluate the performance to manage the risks of organization to be appropriate.

2.2 Risk Factors on Business Operations of the Company

2.2.1 Risks from Business Operations

- **Risks from Competition, Marketing and External Factors**

Since 2020 onwards, There is COVID-19 pandemic, leading to exponential growth of of rubber glove demand until 2021, resulting in there is fluctuation of the sale price increased and changed rapidly. However, cost price of raw materials is increased as well. Nevertheless, rubber glove industry remains have performance and turnovers higher than as before, resulting in both domestic and foreign major manufacturers such as Malaysia had increased production capacity to respond to higher market's demand as well as there are many new manufacturers established factory in the said period.

Until 2022, especially in the second half of the year, rubber glove market has fierce price competition condition due to rubber glove industry had entered into Over supply condition from increasing production capacity of manufacturers both in Malaysia and Thailand as well as taking over market of manufactureres from China along with COVID-19 pandemic situations around the world that are resolved and going back to normal from early 2020 onwards, are factors affecting average sale price decreases significantly compared to period of COVID-19 pandemic or 2020-2021.

After the Over-supply period, the Company continues to focus on developing new products and focusing more on custom made customers group to reduce the risk of price wars and differentiate the Company's products.

- **Production Risk Factors on Procurment of Raw Materials**

The Company had procured main raw materials for domestic and foreign manufacturing by purchasing natural latex from sellers and farmers in nearby area.

Concentrated Latex 60% (Natural Rubber)

The Company had procured concentrated latex from domestic trading partners with risks from fluctuation of raw material price. Concentrated latex 60% is the main raw material of manufacturing the rubber gloves by average price of concentrated latex in 2023 increases from 2022. In order to prevent the risk of raw material shortage and price of raw materials, the Company therefore orders concentrated latex from many ditributors both in eastern and southern parts of Thailand by entering into futures contract, and compares the

quotations of at least 3 distributors in the same period of time along with compare with estimated price from Rubber Authority of Thailand (RAOT), in addition, the Company also considers the Credit Term as well.

Nitrile Rubber

In 2023, 100% of synthetic latex is purchased from domestic distributors which is not purchased from abroad. Regarding to the demand for nitrile gloves has decreased. Production plans for some products have relatively short planning periods, which is caused some periods cannot buy and wait for synthetic latex from abroad due to lead time constraints.

Fuels for Steam Energy

The Company uses fuels from 4 fuel sources consisting of palm kernel shell, woodchips, wood pellet and wood slab by all of them are purchased from domestic trading partners, however, in order to procure sufficient and quality raw materials, the Company therefore advance orders as well as finds trading partners to be sufficient to be able to deliver raw materials for production.

● **Production Risks**

Production is a key factor of business operations. If machine is unable to run normally, it will cause the losses of opportunity of monetization and delivery of products to customers. However, the Company has plan to preventive and improved the machines regularly in order to be able to manufacture products continuously. There is also investment in machinery for improving former 's holder in 2023 as well as additional invested to enhance efficiency of production.

● **Personnel Risks**

The Company shall rely on expertised personnel on manufacturing rubber gloves as well as shall always administer numbers of employees to be sufficient for manufacturing due to characteristics of the Company's products shall rely on personnel with experts and specific skills.

However, the Company has set appropriate and competitive compensation and pay attention to treat to employees fairly and correctly under the principles of human rights, to have training and development of employee's skill continuously in order to maintain numbers of personnel to be sufficient and enhance capability of personnel to keep up with change of competition world at the present and in the future, and give opportunity to personnel to sustainable grow up together with the Company.

- **Inventory Risks**

Due to the Company's business is the manufacturing industry, therefore suffers to the risks of inventory level. If numbers of inventory is too low, the Company may suffer the risks of delivery and sale opportunity. If there is over inventory, it may be the burden of the Company in part of too high Carrying Cost.

The Company therefore has inventory management in order to the inventory to be in the appropriate level by considering the delivery schedule, to be sufficient for sale and delivery to customers in the prescribed term, taking account into the use of Working Capital to be the highest useful and appropriate, and maintain inventory level to not too high or low by analyzing product age in order to use in management and efficient production planning.

- **Foreign Exchange Risk**

The Company is exposed to foreign exchange risk due to the sale of products to foreign customers and the purchase of raw materials from abroad. The Company has opened both USD and EURO foreign currency deposit accounts since November 2021 to manage risks by using foreign currency received from customers and using the same currency to pay for goods, also known as Natural Hedging. It also reduces the risk of currency fluctuations. Additional financial instruments such as Forward Contracts or Option for foreign currencies that cannot be processed as above are considered.

- **Risk of Outstanding Payment from Customers**

The Company considers to give different credit term for each customer under the principles of the Company by policy for selecting each customer will be considered the customer's reputation and financial status in order to ensure that there will not be problem on debt payment that may occur in the future.

For estimating the allowance for doubtful accounts, the Company will consider it from debtor's behavior. If it is over the given term and there is the definite indication that the debtor is unable to pay for debt to the Company, the Company will estimate the full amount of allowance for doubtful accounts and demand payment of a debt closely in order to reduce the loss.

- **Environmental and Community Risks**

In order not to affect the business in the way of the environment and the community, the Company has implemented the standards. Relevant legal requirements, The raw materials in some production processes have been changed to be environmentally friendly and not cause harm to the surrounding communities. Fuel is used

from biomass energy. There is a control system, treatment and measurement of the quality of waste before releasing it to the public. By operating within legal limits, as well as continuously improving the treatment system, reporting and disclosing to government agencies and the public to ensure that it does not affect the surrounding area.

3. Driving business for sustainability

3.1 Sustainability Management Policy and Goals

3.2.2 Analysis of Stakeholders in the Business Value Chain

The Company has main business as manufacturing rubber gloves both in parts of gloves manufactured from natural latex and synthetic latex by the Company has glove manufacturing factories for delivering to domestic and foreign customers with procedures in value chain as follows:

Main Activities	Procure raw materials from domestic and abroad	Manufacture and package products in the Company's factory	Use domestic and foreign transportation services for delivering products to customers	Providing after-sales services
Supporting Activities	Marketing, accounting, financing, procurement, personnel, IT			

Main Activities

Procurement of Raw Materials for Manufacturing

The Company purchases main raw materials consisting of natural latex, synthetic latex and chemical substances for manufacturing by the natural latex is purchased from domestic source consisting of direct purchase from local area and other sources such as Rayong, Chon Buri and provinces in southern part including Surat Thani, etc., which the Company pays attention to quality of concentrated latex of each distributor. For synthetic latex, it is purchased from manufacturer in abroad to support the manufacturing.

Manufacture and Package in the Company's Factory

The Company manufactures gloves using machines as well as packages the products in the factory under each customer's needs and control manufacturing and quality by personnels both in production and engineering departments by the Company has been certified relevant standards from both government agencies and customers. The manufactured products has been manufactured to sell domestic and in abroad which shall be passed the required and accepted standards by customers.

Transportation of Product Export

The Company uses both domestic and foreign transportation services to deliver products to customers by using the land water transportations for foreign market.

After-Sales Services

The Company has Marketing Department to be responsible for supervising the product's quality after sales with receiving complaints in case of product has problems and resolving problems for each customer.

Supporting Activities

Marketing

The Company has Marketing Department to be responsible for building reliability to the Company as well as coordinate to customers on new needs or improve products for meet each customer's needs as well as building and maintaining relationship for sustainable growth of both the Company and customers.

Personnel Management

Personnel plays important role in business operations, the Company therefore pays attention to personnel, sufficiency of manpower, creating incentives at work, improving competency of personnel such as training and safety of workers.

Accounting and Finance

The Company emphasizes to have a good, correct, accurate and fast accounting and financial system in order to obtain updated information for planning a business plan in the present world.

IT System Development

The Company focuses on taking technologies that are able to develop supporting works to more quick and efficient with development plan for website and social media to build reliability to the Company and support product information to customers, improve office suppliers for personnel, and install ERP system for integrated work, etc.

3.3 Management of Environmental Sustainability

3.3.1 Environmental Policy and Guidelines

- **Management for Reducing Greenhouse Gas Problems**

Quantity of greenhouse gas emission is reflected in form of Carbon Footprint Assessment of products and Carbon Footprint of organization which are assessment of quantity of greenhouse emission that a product or organization emits into the atmosphere of earth, depending on relevant activities as well as use of relevant resources or the organization.

Shun Thai Rubber Gloves Industry Public Company Limited is one of rubber glove manufacturing entrepreneurs paid attention to the importance of participation in reduction of quantity of greenhouse gas emission. The Company therefore prepares the Carbon Footprint Assessment Project of organization for fiscal year 2022 in order to reflect quantity of greenhouse gas emission in each activity period in order to find out guidelines for reducing quantity of greenhouse gas emission aiming to be organization with net greenhouse gas emission as Net Zero in the future.

Sources of Greenhouse Gases from Business Operations dividing into 2 aspects, namely

- 1.) Direct greenhouse gas emission such as burning of engine, uses of refrigerant and fuels, generation of methane gas from employees and waste water treatment system, etc.
- 2.) Indirect greenhouse gas emission such as indirect greenhouse gas emission from purchasing raw materials and services, indirect greenhouse gas emission from acquisition of fuels and energies, waste management, greenhouse gas emission from transportation of wastes from products for disposal, etc.

In 2022, it is the first year of assessment. The Company emits 2,476 tons of carbon dioxide equivalent (tCO₂e) and indirect greenhouse gas emissions of 23,903 tons (tCO₂e) as a base to measure the following year's performance

In 2023, the Company has increased the scope of greenhouse gas emission calculation to cover more in all activities of the organization. Direct greenhouse gas emissions amounted to 1,828 tons carbon dioxide equivalent (tCO₂e) and indirect greenhouse gas emissions amounted to 1,612 tons carbon dioxide equivalent (tCO₂e).

- **Water Resource Management**

Water resource is a limited resource, the Company should use water resource efficiently. Use of public water resources shall correspond to laws related to water resource utilization. In addition, water resource dependence also may cause risk to business operation such as in case of business suspension due to water resource shortage or higher cost of business operation from water resource shortage.

Relevant Standards

Water Resources Act B.E. 2561 (2018)

- Public Water Resources Utilization
 - The use of public water resources for the industry, tourism industry, electricity generation, waterworks and other undertakings is classified as Water Use of Type Two (Section 41 (2));
 - The use of public water resources for a large-sized undertaking which requires the use of a large quantity of water or possibly has effects across drainage basins or covering large areas is classified as Water Use of Type Three (Section 41(3));
 - The water use of Type Two requires a licence from the Director-General of the Royal Irrigation Department, Director-General of the Department of Water Resources or Director-General of the Department of Groundwater Resources, as the case may be, with the approval of the drainage basin committee in whose area such water resources are located (Section 43);
 - The Water Use of Type Three requires a licence from the Director General of the Royal Irrigation Department, Director-General of the Department of Water Resources or Director-General of the Department of Groundwater Resources, as the case may be, with the approval of the N.W.R.C. (Section 44);
 - The Water Use of Type Two and Type Three shall pay for water use under rules, procedures and conditions of for the collection or deduction of, or exemption from, water use charges, provided that they may be prescribed differently, having regard to activities and the nature or quantity of water use of each type and in each drainage basin (Section 49);
 - In order to benefits of inspection and control of public water use, licensee of Water Use of Type Two and Type Three shall install the used measurement or quantity evaluation tools and collect necessary data in order to the competent officers appointed by Minister of Agriculture and Cooperatives or Minister of of Natural Resources and Environment, as the case may be, to inspect under rules and procedures as prescribed by Director-General of the Royal Irrigation Department, Director-General of the Department of Water Resources or Director-General of the Department of Groundwater Resources, as the case may be, by publishing in the Royal Gazette.

Policy and Guidelines

In order to support the goals of sustainable water management, the Company is aware of its responsibility for water resource use in all of the Company's establishments to have maximum benefits and available for everyone. The Company has complied with Water Resources Act B.E. 2561 (2018), namely the Company is approved to use public water resources and pay for water use as prescribed by laws as well as has installed

measurement and evaluation tools of the used water quantity and collect data regarding water resources use under the laws.

The Company has goals to operation for efficient water resources use and concrete water resources management in many aspects such as

- Reduce water resource use in production process per production of product unit by 5%;
- Take account into quality and quantity of water use in order to unaffected to community around the factory.

The Company has operated under laws related to water resources use and measured the water resource use in the process as well as analyzed the risks from water resource dependence continuously.

Performance

The Company has implemented guidelines and targets related to supporting the efficiency of water resource utilization and analyzing various risks arising from dependence on water resources.

Year	Amount of water used (m3/million pieces)	Reduced water consumption rate (percent)
2020	1,389	-
2021	1,325	-4.60
2022	1,786	34.79
2023	2,335	30.73

Remark : Due to the past year 2023, there has been an increase in the product cleaning process to ensure that it is safe for consumers.

The Company has operated under guidelines and goals regarding supporting efficiency of water resource use and risk analysis from water resource dependence in many aspects.

The Company knows that water resource dependence may affect the business suspension and cost of business operation of the Company. In order to manage the occurred risks, the Company therefore operates as follows:

1.1 Control manufacturing process and water flow rate at all points to be under the regulations by setting points and checks it 2 times per week;

- 1.2 Control the water pressure to be continuously stable between 3.0-3.5 bar at the source.
- 1.3 Control the on-off of the water valve. in case of stopping the production line. It is forbidden to leave the water valve open without the glove being produced.
- 1.4 Transition schedule, empty the tank at specific intervals to reduce unnecessary discharge of effluent.
- 1.5 Control the machine speed according to the specified plan and continuously.
- 1.6 Control the machine to run production continuously. Reduce the target not to exceed the target of the relevant departments throughout the company (KPI related)
- 1.7 Provide Meeting every day before work time, mention to the efficient use of water resources and follow up continuously.

- **Waste Management**

Waste production (industrial waste, hazardous waste) as well as any operation contributed in waste production of the Company may affect to environment and at the same time may casue the Company risks to legal liability from waste management. The Company therefore should display information regarding quantity of waste that the Company has produced or contributed in production, and guidelines for waste management and residue disposal and reduce impact from waste from business operation.

Relevant Standards

1. Announcement of the Ministry of Interior on solid Waste management B.E.2560 (2017)
2. Act on the Maintainance the Cleanliness and Orderliness of the Country B.E.2535 (1992)
(No.1)
3. Act on the Maintainance the Cleanliness and Orderliness of the Country B.E.2560 (2017)
(No.2)
4. Factory Act B.E.2535 (1992) Re: entitled Disposal of Wastes or Unusable Materials B.E. 2548 (2005)
5. Act Public Health B.E. 2535 (1992)

Policy and Guidelines

The Company has legal policies and guidelines regarding maintainance of cleanliness and orderliness of the country as well as Factory Act entitled waste and attempt to reduce quantity of waste and impacts from waste to environment.

The Company has goals of operation to reduce waste production and impacts on environment from waste production of establishment by

1. The Company provides program of awareness cultivation and raising awareness to employees in waste sorting from the origin by communication via electronic media, Line application as well as Daily Morning talk, sorting and applying waste to be benefits continuously;
2. The Company has improved production system to reduce waste and impacts from waste production from business operations;
3. Reduce quantity of waste per production unit by 5% compared to base year (2020) by 2027.

During the last year, the Company had operated under laws regarding maintenance of cleanliness and orderliness of the country, and measured reduced wastes.

Performance

During the last year, the Company has operated under policy and guidelines regarding waste production reduction with the performance on waste management was reduced from year 2022 as shown as follows:

Year	Hazardous waste(tons)	Decrease in the proportion of hazardous waste (percent)	Non-hazardous waste (tons)	Decrease in the proportion of non-hazardous waste (%)
2020	31.21	-	161.72	-
2021	16.39	-47.48%	87.16	-46.10%
2022	13.40	-18.24%	87.31	+0.17%
2023	8.32	-37.9%	44.6	-48.92%

The Company has planned guidelines as follows:

1. Held training, review and campaign to raise awareness to employees via social media and Daily Meeting;
2. Sort and store unusable waste by types and storage point on order to take to utilize or send to dispose under the laws efficiently;

3. Improve production process by install equipment to reduce waste production.

- **Energy Management**

Energy is a main composition in business operation and an important cost for engaging in business, at the same time, energy consumption always affects environment. Therefore, the Company is responsible for complying with laws regarding energy conservation, cooperating to use energy economically, efficiently and worthily as well as promoting efficient technology application.

Relevant Standards

Energy Industry Act B.E.2550 (2007)

- The government should promote economical, efficient and worthwhile use of energy, including application of efficient technologies as well as the distributed generation system, in order to reduce investment in energy utilization, fuel costs in generation processes, health impact and other associated impacts resulting from energy generation and utilization; and to increase economic competitive edge of the country (Section 8(2))

The Energy Conservation Promotion Act B.E. 2535 (1992)

- The Company with controlled factory shall comply with the Ministerial Regulations prescribing standards, rules and procedures for energy management that must be followed by owner of the controlled factory (Section 9(1));

- The owner of the controlled factory must provide a person, who will be the permanent responsible person for energy in each controlled factory as well as to prescribe qualifications and duties of the person, who will be permanently responsible for the energy (Section 9(2)).

Policy and Guidelines

The Company has set a policy and guidelines for energy management, referencing from Energy Industry Act and The Energy Conservation Promotion Act as well as standardized international laws in order to reduce quantity of energy use and impacts on environment.

The Company promotes participation of employees for being a part of energy use reduction which has communicated the measures, campaigned the participation as well as monitored and reported the performance.

- Adjust time for turning on and off air conditioners in all buildings,
- Turn off the lights in buildings and parking at the scheduled time and turn on it as much as necessary,

- Campaign to turn off the light in the meeting room and unplug electrical devices when not in use,
- Turn off computer screen/unplug electrical device/turn off the lights, fans, air conditioners at the unused point.
- Improve lighting system by using LED lamps.
- Change motors and equipment into an Inverter System.

During the last year, the Company has complied with laws on energy conservation promotion, and operated to promote energy use efficiency.

Performance

During the last year, the Company has implemented policy, guidelines and goals regarding energy use reduction.

Year	Amount of electrical energy consumed per unit of production (KW/Million Pieces)	*Reduced amount of electrical energy (%)
2562	15,285.25	-
2020	13,864.31	-9.30%
2021	13,146.35	-13.99%
2022	16,503.10	+7.97%
2023	19,205.85	+25.65%

Remark : In 2023, production decreased by 40%. , - *Compare with 2019

Work Plans

1. Control voltage drop not exceeding 3%,
2. Install common lighting systems at all points to be automatic systems,
3. Replace the broken fluorescence light bulb to be LED,
4. Replace spotlight, mercury-vapor lamp to be floodlight LED,
5. Change the control system from using Magnetic Star-Delta to Inverter and reduce the motor frequency to save energy.

Facts, Progress, Reasons

During the last 2 years, the Company had attended the program of energy conservation promotion in small and medium industrial factories, Department of Alternative Energy Development and Efficiency.

- **Pollution Management**

- **Air pollution**

The Company is responsible for complying with laws regarding promotion and maintenance of environment quality which the said compliance of laws always affects to cost of business operation. In addition, pollution may cause the risks that the Company shall be liable legally. The Company therefore collect data regarding emission of pollutants directly and indirectly in order to show the risk of the Company and environment from emission of pollutants.

Relevant Standards

1. Enhancement and Conservation of National Environmental Quality Act B.E. 2535 (1992)
2. Factory Act B.E. 2535 (1992)
3. Ministerial Regulation No. 2 B.E. 2535 (1992) Issued pursuant to the Factory Act B.E.2535 (1992) (Discharge by Dilution is prohibited)
4. Notification of Ministry of Industry Re: Preparation of Report on Type and Amount of Pollutants Discharged from A Factory B.E. 2558 (2015) (Air)
5. Notification of Ministry of Industry Re: Reporting Form For Type And Amount Of Pollutants Discharged From A Factory B.E.2559 (2016)

Policy and Guidelines

Monitor the discharged air quality of the Company and inspecting air quality as per indicators under the regulations of laws.

The Company has prescribed to measure parameters: 1. Total Suspended Particulate (TSP), 2. Sulphur dioxide (SO₂), 3. Nitrogen dioxide (NO₂) and 4. Carbon monoxide (CO) in discharged air which meet measures as prescribed in the regulations under the laws.

The Company has recorded the air pollution data discharged out of the factory in order to ensure that it meets the standards of regulations of Department of Industrial Works.

Performance

Year/Parameters		Boiler 15 T				Boiler 20 T			
		TSP Standard	SO2 Standard	NO2 Standard	Standard CO.	TSP Standard	SO2 Standard	NO2 Standard	Standard CO
		≤320 mg/m3	≤60 ppm	≤200pp m	≤690p pm	≤320 mg/m3	≤60 ppm	≤200pp m	≤690pp m

	2 nd time	69	<0.1	146	546	37	<0.1	146	550

During the last year, the Company has implemented policy, guidelines and goals regarding discharged air pollution management. The company and can be controlled to meet the standards and requirements of the Department of Industrial Works.

Work Plans

The Company has measured air quality discharged out of chimney legally every 6 months and has the report certified by external company that has been certified by Department of Industrial Works. The discharged air quality will be taken to report in the Report on Types and Amount of Pollutants Discharged from A Factory every 6 months.

Facts, Progress, Reasons

During the last 2 years, the Company has been inspected by competent officers via the Report on Types and Amount of Pollutants Discharged from A Factory regularly by the Company does not operate illegal action anyway and improves the treatment system continuously.

- Water Pollution

The Company is obliged to comply with laws related to the promotion and preservation of environmental quality. Compliance with the law incurs operating costs. In addition, polluters can pose legal risks. For this reason, the Company has compiled data on emissions that will help to identify the Company's risks and potential risks of emissions.

The Company has a standardized waste water treatment system, water from all production processes will enter the waste water treatment system to have water quality as required by law. The Company has installed a BOD Online system that connects the system with the Department of Industrial Works. This can ensure that the water discharged to the public meets legal standards.

Related Standards

1. National Environmental Quality Promotion and Conservation Act B.E. 2535 (1992)
2. Factory Act B.E. 2535 (1992)
3. Ministerial Regulation No. 2 issued under the Factory Act B.E. 2535 (Prohibition of discharge by Dilution)
4. Notification of the Ministry of Industry on the Preparation of Report on the Type and Amount of Pollutants Discharged from the Factory B.E. 2558 (water)
5. Announcement of the Ministry of Industry on Report Form on Type and Amount of Pollutants Discharged from Factory B.E. 2559 (2016)

Policies and Guidelines

Monitor the quality of the Company's discharged water and monitor the quality of the air according to the indicators in accordance with legal requirements.

The Company has required parameter measurements. 1. Acidity-alkalinity (pH) 2. COD (Chemical Oxygen Demand) 3. BOD (Biochemical Oxygen Demand) 4. Total Suspended Solids (TSS) in discharged effluent comply with the measures prescribed in the statutory requirements.

The Company has recorded the water pollution discharged outside the factory to ensure that it meets the standards set by the Department of Industrial Works.

Performance

In the past year, the Company has implemented the policy, guidelines and targets related to discharge of effluent.

Year/Parameters	pH	BOD	COD	SS
	standard	standard	standard	standard
	5.5-9	<20ppm	<120ppm	<60ppm
2020	7.91	8.12	72.54	17.43
2021	7.91	6.33	66.83	14.96
2022	8.24	5.75	67.58	13.78
2023	8.34	7.08	61.75	9.99

Work Plan

The Company conducts monthly legal effluent quality measurements and displays them online to the Department of Industrial Works in the form of BOD Online, where the results of the external effluent quality measurement will be reported in the report on the type and amount of pollutants discharged from the factory and can be controlled to meet the standards and requirements of the Department of Industrial Works.

Facts, Progress and Reasons

In the past, the Company has been regularly audited by relevant authorities through reports on the type and amount of pollutants discharged from the plant. The Company has not taken any illegal action.

- **Hazardous Materials Management**

Production, import, export or possession of hazardous materials is activity under the regulations of the Hazardous Substance Act B.E. 2535 (1992) which in business operations regarding hazardous materials, the Company is necessary to know and understand information on hazardous materials as well as environmental management due to the hazardous materials are able to cause the risks to health of workers and users as well as environment.

Relevant Standards

The Hazardous Substance Act B.E. 2535 (1992)

Section 18 hazardous substances shall be classified into categories as per the necessity of control as follows:

(1) Category 1 Hazardous Substance: The production, importation, exportation or possession of hazardous materials shall be in accordance with the prescribed criteria and procedure;

(2) Category 2 Hazardous Substance: The production, importation, exportation or possession of hazardous materials requires an advance notification to be made to the competent official, and shall be in accordance with prescribed criteria and procedure;

(3) Category 3 Hazardous Substance: The production, importation or exportation or possession of hazardous materials requires licensing;

(4) Category 4 Hazardous Substance: The production, importation or exportation or possession of hazardous materials is prohibited. For the purpose of prevention and extinguishing of any harm which may happen to people, animals, plants, property or environment, the Minister of Industry, with the recommendation of the Committee, shall have the power to publish in the Government Gazette the name, or properties and category of hazardous substance, enforcement period and responsible agency for the control of such hazardous substance.

Policy and Guidelines

The Company has policy and guidelines under laws on hazardous materials and take account into risks to health of workers and users, and risks to environment from results of hazardous materials involvement of the Company.

The Company has goals of operation to reduce risks of hazardous substances affected to the worker's and user's healths as well as environment by operating as follows:

1. Improve process to reduce waste production by 5 %
2. Improve production process to reduce chemical substances use in the process.

During the last year, the Company has complied with laws on hazardous materials, and reduced hazardous substances/materials which meet goals as prescribed by the Company.

Performance

The Company has implemented policy, guidelines and goals regarding the use of hazardous substances/materials.

Year	Amount of hazardous waste(tons)	Reduced volume (%)
2563	31.20	-
2021	16.39	-47.47%
2022	25.90	+58.02%
2023	8.32	-67.88%

Remark : Year 2023 has less hazardous waste than 2022, which is consistent with production volume.

Work Plans

In order to assess the risks of hazardous substances in production process and products affected the worker's or user's healths and environment, the Company has:

1. Specified hazardous substances/materials on site and stored it as SDS documents at the center,
2. Collected data regarding hazardous substances,
3. Assessed the risks by collecting and analysing data regarding hazardous substances and potential danger,
4. Set a risk control plan,
5. Improved the measures regularly,
6. Collected data of risk control for advantages in risk control review and development.

3.4 Social Sustainability Management

3.4.1 Policy and Guidelines

- **Certification of Freedom of Association and Protection of Rights of Collective Bargaining**

Frustration of employees in establishment always leads to problems of business operation more or less. Hearing those problems and solving it are responsibility of employer because in addition to building good encouragement in working to employees, it also causes the employer's business run smoothly. However, each employee has different problems and unhappinesses regarding work, some problems are personal problem and

some problems are collective problems. Resolving collective problem is the first problem that employer should pay attention. Grouping of employees therefore is like as a forum that employees can reflect obstacles and problems on working and their need regarding work conditions. If their needs have the common point, it can be assumed that it is the important problem of the establishment or business operation that employer or enterprenuer should pay attention and solve it promptly by the companay may attend in negotiation or discussion for solving the said problems with employees. If the Company is unable to agree with employees, they should reconcile it to end the uncorresponded desire with good understanding which acquired answer is satisfied by both parties, leading to peaceful in labor society. However, if negotiation process is failed, the Company should accept the labor pressure, namely lockout and strike as tools assisted both parties to have opportunities to negotiate for mutual understanding which may lead to agreements on acceptable basis. Observation that is the important challenged issue is relevant provisions of Thai laws remain uncorrespond to international principles completely. In order to good corporate govenrance which is acceptable and correspond to international principles and guidelines, the Company therefore considers acceptable guidelines internationally as well.

The Company has policy and guidelines supported grouping and negotiation of employee corresponding to principles under the Labour Relations Act, B.E. 2518 (1975) as prescribed to the Company as a private organization.

In 2023, there is no action and no disputes. In 2024, the Company will establish a capacity development and awareness building program for employees in the organization to make the Company's employees aware of the importance of participating in constructive formulation of working conditions and employment conditions.

- **Elimination of Forced Labor and All Conscriptions**

The Company has policy and guiedelines to not support exploitation of forced labor by employment of the Company shall be under the provisions of laws and fair. However, the Company awares of the importance of scheduling working time, resting time, holidays, leave days and remuneration payment both in normal case and case of working on holidays to be under the Labour Protection Act B.E. 2541 (1998) as prescribed to the Company as a private organization.

In 2023, there are no disputes, and the Company has taken steps to raise employee awareness in the organization. To make the Company's employees aware of the importance of policies and practices that do not support forced labor in order to comply with the law and fairly.

- **Abolition of Child Exploitation and Child Exploitation in Worst Forms**

Poverty is the important obstacle of prosperity of economy and social.. Education is the important tools of elimination of poverty. Child's working shall not be obstacle of education. Development of growth, fertility and dignity of child as well as the child can work in conditions that is not danger to body and mind as follows: child employment shall be restricted under stricted conditions as well as it shall not reduce opportunities of education, learning and development of child's experiences. However, the Company shall understand as basis that this principle focuses on control of "child labor employment" which is condition caused the child falls in status of an employee or labor under supervision of employer which differs from "child exploitation" that is the general term and may include parents, legal representatives as well as guardian asking the child to work in order to promote learning development which should be done and unlimited the scope as like as the child employment.

In 2023, there are no disputes, and the work of raising employee awareness in the organization and improving regulations and regulations has been implemented. To make the Company's employees aware of the importance of participating in policy compliance.

- **Employment and Occupation Discrimination Elimination**

Inequality and difference cause bias and the bias is the root cause of disputes in labor society. The different employment and laboring lead to unsatisfaction of worker, resulting in posing questions on equality and non-discrimination. If those who receives the answer unsatisfy in the answer, it always leads to social problems. Therefore, labor practices should use characteristics of performance work for working and worker's competency as the basis. If the Company will prescribe the different working conditions or employment conditions as follows: different employment and prescribing working conditions from the difference of birthplace, nationality, language, gender, age, disability, physical conditions or health, person's status, economic or social status, religious beleif, education and training, or political opinions should not occur, therefore, the same working, the same or similar characteristics should be the same or equal treated.

In 2023, there is no action and no disputes, and in 2024, the Company will organize capacity development and awareness raising programs for employees in the organization and improve regulations and regulations. To make the Company's employees aware of the importance of participating in policy compliance..

- **Supporting Equality between Gender and Sexuality**

Gender and Sexuality Equality has a root cause from principles of equality and discrimination with evolution from calling for gender equality between men and women and currently, has expanded to gender

equality of everyone whether which Sexual Orientation and Gender Identity are. In addition to labor dimension, entrepreneurs should take the Gender Lens, especially respect of gender equality to intervene in their and partner's business operations in order to prevent discrimination from gender to other stakeholders such as not supporting gender stigma or sexual objectification in their and partner's advertising media, loan approval to customers regardless sexual orientation or gender identity, as well as respect of right to privacy regarding sexual orientation or gender identity of customers or other stakeholders.

In 2023, there is no action and in 2024, the Company will organize capacity development and awareness raising programs for employees in the organization and improve regulations. To make the Company's employees aware of the importance of participating in policy compliance.

- **Health and Safety Right Protection**

The Company has policy and guidelines supporting health and safety right protection by operating to prevent the Company's goods or products with characteristics that is unsafe to consumers which may be the offense under the Liability for Damage Arising from Unsafe Products Act B.E. 2551 (2008), and to the Company's goods or products meet the relevant industrial standards which all these correspond to sustainable development goals.

In 2024, the Company will organize capacity development and awareness raising programs for employees in the organization and improve regulations. To make the Company's employees aware of the importance of participating in compliance with regulations.

- **Personal Rights and Personal Data Protection**

In 2023, the Company provides training for employees on the protection of personal rights and personal data, and implements the announcement of the Personal Data Protection Policy, Personal Data Protection Policy and Guidelines to be effective for the Board of Directors. Directors and all employees of the Company and its subsidiaries, including business partners, service providers and stakeholders of the Company, and applicable to the activities of the Company and its subsidiaries related to personal data in accordance with the principles and provisions of the law.

4. Management Discussion and Analysis (MD&A)

4.1 Analysis of Operations and Financial Status, Important Change

- **Overall Operations**

In 2023, the Company faces fierce price competition as the latex glove industry has entered an oversupply state due to the increase in production capacity of manufacturers in Malaysia and Thailand, as well as the entry of manufacturers from China, combined with the easing of conditions of the COVID-19 pandemic. The world has started to return to normal life since the beginning of 2020.

However, the Company is in the process of improving operational efficiency. As a result, productivity continues to improve from competent people providing advice. Improve the management team to be efficient. In planning work and managing problems in the right way, reduce risks in various aspects. and differentiate the company's products. To increase its market share.

Future Strategies and Plans

1. Improve product quality and raise selling price level for existing customers
2. Recruit new export customers to increase margin product portfolio.
3. Change product groups to have better margins, including industrial markets. Beauty businesses and more dealer groups.
4. Reduce costs in both COG and operation

● **Performance**

Income

The proportion of income consists of: Domestic revenue accounted for 41% of sales of 157.44 million baht and foreign revenue accounted for 59% of sales of 230.36 million baht.

Revenue from sales of rubber gloves in 2023 totaled 387.80 million baht. This was due to fierce competition in the post-COVID-19 environment where customers had a large inventory of products, resulting in a decrease in demand for products.

Everything. The company has sold a total of 360 million gloves. The average selling price per piece also decreased. Compared to 2022, this is equivalent to a 10% decrease.

Cost of goods sold

The average cost of sales in 2023 increased by 2% from 2022, mainly due to a decrease in production in line with sales.

Gross Profit

Gross loss was 46.38 million baht. This was mainly due to a 10% decrease in average selling prices and a 34% decrease in the number of sales from 2022. 2% increase compared to 2022.

Loss on asset impairment

In 2023, the Company had an impairment loss of 0.81 million baht (in the separate financial statements) due to impairment in the production mold segment and for the consolidated financial statements there was an impairment loss of 29.85 million baht due to the subsidiary having an increase in impairment items from estate machinery and other assets. As a result, in the consolidated financial statements of the Company. There was an impairment loss on assets in the amount greater than the separate statements.

Sales and administrative expenses

For the expenses of SG&A, the Company focuses to reduce the expenses by decreasing the cost of sales by 27% and administrative expenses increased by 16% from 2022 use for target aim to improve operational efficiency As a result, productivity continues to improve.

Net Profit

5.2 Other Material Facts

5.2.1 The Company already had submitted the request for resuming normal flow of execution (Resume Stage) on March 31, 2021 and currently, it is in process of the request consideration of Stock Exchange.

5.3 Legal Disputes

On August 29, 2023, the Company filed a lawsuit with its subsidiaries in civil court stating that on April 30, 2016, the subsidiary held the 2016 Annual General Meeting of Shareholders to consider the increase of registered capital, in which the subsidiary informed and presented the plan to the Company and other subsidiary shareholders that the subsidiary plans to expand the work to support the construction of power plants and support the construction of additional factories and wishes to increase the capital to use the money for such expansion. The actions of the said subsidiary caused substantial damage to the Company, provided that the Company had initially learned that the subsidiary did not intend to carry out expansion work to support the construction of the power plant and support the construction of additional factories. Therefore, the Company shall not exercise its right to subscribe and purchase additional shares and pay for the purchase of additional shares in the amount of 168,875,000 million baht to the subsidiary. Therefore, it is evident that the subsidiary used fraudulent tactics to deceive the plaintiff and exercise the right to purchase and pay for the newly issued shares of the subsidiary. As a result, the Company wrote to the subsidiary to exercise its right to expunge the jurisprudence and recover the capital increase and damages, but the subsidiary ignored the said letter, and the Company asked the court to order the subsidiary (1) to pay the sum of 168,000. (2) To pay compensation arising from the infringement causing damage to the Company, such as loss of benefits and opportunities to use such money to generate income, and loss of opportunities to conduct capital business, including the wages of consultants and lawyers, and expenses of various operations, with damages in the amount of 80,000,000 million baht with interest at the rate of 5% per annum from August 29, 2023 until fully paid to the Company by the subsidiaries. (3) The subsidiary shall reduce its registered capital and proceed to amend the shareholders' register. On November 24, 2023, the Company and its subsidiaries entered into a compromise agreement and the court rendered a judgment in favor and neither party appealed.

In addition, on February 19, 2021, the company filed a lawsuit against the perpetrators. For the offence of making a false statement to the Registrar of the Registrar of the Registrar of Partnerships, Bangkok. later on On October 26, 2023, the Court of First Instance upheld the judgment against the directors of the former subsidiary and none of the parties appealed the final judgment.

5.4 Secondary Market

The Company does not have registration in stock exchanges of other countries.

5.5 Financial Institution with Regular Contact (only in case of issuance of debt instruments)

The Company does not have issuance of debt instruments.

Part 2

8. Report on Key Performance of Corporate Governance

8.1 Summary of the Committees' Performance in the Previous Year

The committees reviewed and improved the corporate governance policy, and issued additional issues of corporate governance to be compliant to the sustainability report and One Report. Moreover, the committees implemented to prepare various aspects to conform to the standards of One Report.

8.1.1 Nomination, Development, and Performance Appraisal of the Committees

A. Independent Committee: Selection Criteria, Qualifications, and Nomination Procedure

Qualification of Independent Committee

Independent Committee refers to a person with all qualifications and independence specified by The Securities and Exchange Commission, and the Stock Exchange of Thailand, as follows.

1. Hold shares not more than 1% of paid-up capital of the Company, affiliated companies, associated companies, and related companies.
2. Be a committee who does not involve in the Company's management; is not an employee or a consultant with regular salary; is not a professional service provider receiving service fee more

- than 2 million baht per year from the Company, affiliated companies, associated companies, related companies, and juristic people which may have conflict of interest in the past not less than 2 years.
3. Be a committee without direct/indirect benefits or stake in terms of fianance and management of the Company, affiltated companies, associated companies, or juristic people which may have conflict of interest.
 4. Be a committee who is not relevant or a close relative of an executive or a major shareholder.
 5. Be a committee who is not appointed to be a representative to protect interest of the Board of Directors, a major shareholder, or a shareholder who relates to the major shareholder.

In addition, the independent committee must express ability to give opinions or report freely according to the assigned mission without consideration on any interest concerning assets or position. The independent committee must not be under influence of any person or groups of people, and he/she should not be forced not to give opinion as it should be.

B. Nomination of the Committees and Top Executives Through the Nomination Committee

Nomination of the Committees and Executives

The Nomination and Renumeration Committee is responsible for selecting persons to be appointed as the committees by considering on qualification, knowledge and ability, experience, and regularity of meeting attendance with the Board of Directors to present to the meeting of the Board of Directors for consideration and present to the shareholder meeting for approval of the committee appointment through majority of votes according to the following criteria and procedures.

1. One shareholder has the number of votes equal to the number of shares i.e., one vote per one share.
2. One shareholder may use all their votes according to (1) for selecting one or more persons to be committees but cannot divide their votes to any committee more or less than the other committees.
3. Persons with the highest number of votes in a descending order will be appointed to be the committees equal to the number of persons to be elected at a time. In case that the persons elected in a descending order have equal votes or exceeding number of the persons to be elected at that time, the Chairman shall give a casting vote.
4. In every annual general meeting, one-third of the committees must retire from the positions. If the number of the committees cannot be dividied exactly into 3 parts, the number nearest to one-third

- shall be applied. In the 1st or 2nd years after being registered as the public company, the committee retirement by rotation is performed by drawing lots. In the following years, the committees who have been in the positions for the longest period shall retire. However, the committee with retirement by rotation may be nominated and re-elected to the position.
5. Any committee who wishes to resign before the end of term shall submit the letter of resignation to the Company and the resignation is effective from the date of submitting the resignation letter to the Company.
 6. In case that the committee position becomes vacant by reason other than retirement by rotation, the Board shall elect a new committee to fill in the vacant position. The person who is the new committee shall be in the committee position only for the remaining term of the committee he/she replaces.
 7. Resolution for any committee to retire before the end of term can be done only by virtue of the shareholder meeting resolution through votes not less than three-quarters of the shareholders who attend the meeting, have right to vote, and have shares in total not less than half of the number of shares holding.

Appointment of the Audit Committee

The Board of Committee considers and select persons with qualifications, knowledge, ability, and work experience supporting to the systems of corporate governance and internal control according to standards in the right way. The selected persons must possess qualifications according to the relevant requirements of the laws and the notifications of The Securities and Exchange Commission and the Stock Exchange of Thailand.

1. The Board of Directors appoints the audit committees who have qualifications according to the requirements of The Securities and Exchange Commission and the Stock Exchange of Thailand. At least, 3 audit committees are appointed, and at least one of them must be knowledgeable and experienced in finance and accounting adequately for reviewing creditability of the financial statements.
2. The Audit Committee must contain at least 3 committees. If the number of committees are less than the mentioned number, additional appointment should be made to complete the specified number within 3 months after the date of decreasing number.

3. The Committee selects 1 audit committee to be the Chairman of the Audit Committee, and select a person with qualifications approved by the Audit Committee to be the Secretary of the Audit Committee.
4. A person to be appointed to hold the position of the Company's audit committee must have the following qualifications.
 - 1) Hold shares not more than 1% of paid-up capital of the Company, affiliated companies, associated companies, and related companies, including shares held by a related person.
 - 2) Be a committee who does not involve in management of the Company, affiliated companies, related companies, or the Company's major shareholders; and is not an employee or a consultant with regular salary of the Company, affiliated companies, associated companies, related companies or the Company's major shareholders.
 - 3) Be a committee without direct/indirect benefits or stake in terms of finance and management of the Company, affiliated companies, associated companies, or the Company's major shareholders; and do not have such benefits or stake in the past 1 year before being appointed to be the audit committee in exception that the Board of Directors carefully considers that such benefits and stake do not have any effects on the audit committee's implementation and independence in giving opinions.
 - 4) Be a committee who is not a related person or a close relative of an executive or a major shareholder of the Company.
 - 5) Be a committee who is not appointed to be a representative to protect interest of the Board of Directors, a major shareholder, or a shareholder relating to the Company's major shareholder.
 - 6) Be a committee with capability to perform tasks, give opinions, or report work performance independently as assigned by the Board of Directors without under control of the major shareholders of the Company or a related person or a close relatives of such persons.
 - 7) Be a committee with appropriate knowledge, ability, and skills.

8.1.3 Supervision of Subsidiaries and Associated Companies

The Company determines important guidelines for corporate governance of its subsidiaries and associated companies in order for the Company to manage both subsidiaries and associated companies to operate business in accordance with the Company's various policies, public company laws, and securities and exchange laws as well as regulations and requirements of The Securities and Exchange Commission and the Stock Exchange of Thailand, as follows.

- 1) The Company by the Board of Directors shall appoint persons to be committees, executives, or persons with controlling authority in the subsidiaries and the associated companies according to the shareholding proportion in each company.
- 2) The Company shall determine scope of duties and responsibilities of committees, executives, or persons with controlling authority as the Company's representatives according to Item 1 to supervise the subsidiaries and the associated companies to operate business in compliance to the Company's corporate governance policy and other policies.
- 3) In case that any transactions are connected transactions, the subsidiaries shall deal with such transactions only after getting approval from the Board of Directors meetings and/or the shareholder meetings of the Company. If such transactions of the subsidiaries requires the Company to disclose information to the Stock Exchange of Thailand, the committees who are the Company's representatives need to notify the Company immediately that the subsidiaries plans to deal with such transactions.
- 4) The committees, executives, or persons with controlling authority who are the Company's representatives have duties to disclose information about financial positions and performance to the Company, and to implement duties according to relevant notifications of The Securities and Exchange Commission and the Stock Exchange of Thailand.
- 5) The committees, executives, or persons with controlling authority who are the Company's representatives have duties to disclose and submit information about their own stakes and related persons to the Board of Directors about relationship and transactions with the Company, subsidiaries, and associated companies which may cause conflict of interest as well as to avoid dealing with transactions which may cause conflict of interest.
- 6) The Company shall monitor business operation of the subsidiaries and associated companies, and shall present the analyzing results, opinions, and suggestions to the Board of Directors for supporting decision-making in setting or improving the policies on business promotion of the subsidiaries and associated companies.

8.1.4 Monitor on Compliance to the Corporate Governance Policy and Guidelines

The Company plans for the Board of Directors meeting at least once a month to consider the main agendas set in each year. However, if there is any important agenda, the Chairman of the Board of Directors shall call for the meeting for such important agenda by notifying in advance not less than the period specified by laws. In 2022, the Board of Directors held 18 meetings in total. The authority, duties, and responsibility of the Board of Directors are specified by referring to Public Company Limited Act, Securities and Exchange Act, Regulations of the Stock Exchange of Thailand, and the Company's Articles of Association.

The Scope of Authority and Duties of the Board of Directors

- 1) Have authority, duties, and responsibilities on the Company's management to be compliant to laws, objectives, Articles of Association, and resolutions of the shareholder meetings by adhering to the principle of "Best Practice for Directors of Listed Companies" as prescribed by the Stock Exchange of Thailand.
- 2) Arrange the annual general meeting of shareholders.
- 3) Manage for arranging the Company's balance sheets and profit and loss statements at the end of the Company's accounting period which are audited by auditors and presented to the annual general meeting of shareholders for consideration and approval.
- 4) Determine vision, mission, goals, guidelines, policies, business plans, and budgets of the Company. Control and supervise administration and management of the Executive Committee to be compliant to the assigned policies. However, regarding the issues which are prescribed by laws to receive approval from the shareholder meetings such as capital increase, capital decrease, issuance of corporate bonds, sales or transfer the entire business or some important parts of the Company to other persons, purchase or acceptance of transfer of business of another company to the Company, or amendments to the Company's memorandum of association or articles of association etc.; the Board of Directors needs to receive approval before proceeding.
- 5) Monitor and supervise the management to ensure that the implementation is continuously compliant to plans and budgets. Regularly consider and review such policies, plans, and budgets.
- 6) Supervise for the Company to be compliant to the laws on securities and exchange, notifications of The Securities and Exchange Commission, requirements of the Stock Exchange of Thailand such as in connected transactions, acquisition or sales of important assets, and laws relevant to the Company's business.

- 7) Consider and determine the management structure; and have authority to appoint the Executive Committee, Chairman of the Executive Committee, Sub-committees, and Chief Executive Officer (CEO) as appropriate. Determine the scope of authority, duties, and responsibilities of the Executive Committee, Chairman of the Executive Committee, Sub-committees, and Chief Executive Officer (CEO) as appropriate.
- 8) Prepare the annual report of the Board of Directors. Be responsible for arranging and disclosing financial statements to show the financial position and performance in the previous year, and present to the shareholder meeting for consideration and approval.
- 9) Appoint the Company Secretary to be responsible for implementing various tasks for the benefits of the business operation of Company or the Board of Directors such as arranging register of directors, appointment letters for the Board of Directors meeting, and appointment letters for the shareholder meeting etc.

Compliance to Good Corporate Governance

1. Prevention of Conflict of Interest

The Board of Directors in Shun Thai Rubber Gloves Industry Public Company Limited sets the policy on prevention of conflict of interest on the principle that any decision to entering any transactions of the Company must be for the full benefits of the Company and the shareholders. The Company's personnel including committees, executives, and employees shall not take chance from acting as the Company's personnel to seek advantages for themselves or companions, regardless of financial matters or other matters. They must attempt to avoid involving activities which may cause conflict of interest. However, any business activities either on one's own behalf or on behalf of a juristic person which he/she has stake relating the Company, such transactions must be disclosed according to the criteria specified by the Company. The duties of the committees, executives, and employees are to maintain fair benefits of the Company by limiting the scope of freedom in different activities of the executive committee and employees to the minimum.

2. Use of Internal Information to Seek Benefits

Shun Thai Rubber Gloves Industry Public Company Limited operates business with transparency and awareness of importance in using the internal information to be compliant to Securities and Exchange Act B.E. 2535 (1992) (including the Amendment) and relevant rules and regulations. The Company sets the policy on use of internal information and supervision to prevent the committees and executives including persons in the administration level of accounting or finance at the manager level or higher and employees not to use confidential/internal information of the Company which is not disclosed to public to seek benefits for oneself or others regardless of direct or indirect way, or receiving or not receiving benefits, or using such information for securities trading. The Company performs according to the main policy on use of internal

information to seek benefits and communicate for the committees, executives, and employees to use as practical guidelines.

3. Anti-Corruption

Shun Thai Rubber Gloves Industry Public Company Limited emphasizes on anti-corruption so the Company sets the anti-corruption policy and the whistleblowing and complaint policy with the focus on communicating to the committees, executives, and employees to adhere as guidelines. The whistleblowing and complaint policy is set for listening to opinions, suggestions, or complaints from personnel and outsiders who are affected or at risk of being affected from the Company's business operation or illegal/unethical behaviors regarding corruption of the Company's personnel. The Company implements appropriate internal control to decrease risk of corruption and to raise awareness and values of anti-corruption to the Company's personnel, as the main factors for enabling the Company to prevent corruption in the organization through the anti-corruption measure.

4. Whistleblowing

4.1 Consulting Channel

Before notifying clues, if the personnel are not sure that an action is behavior according to "Item 2 on Scope of Whistleblowing", and want information about the whistleblowing policy and procedure, they can seek information from Code of Conduct and consult with organizations responsible for whistleblowing and complaints or the Compliance Unit of Sustainability, Governance and Corporate Communication Office.

4.2 Whistleblowing Channel

Personnel, outsiders, business partners, and business alliances can notify clues of behaviors according to "Item 2 on Scope of Whistleblowing" through the following channels.

1.1 Whistleblowing organizations and channels which each business group or each company establishes such as creating user accounts or email to particularly receive whistleblowing or sealed letters etc.

Remark: Score Criteria

0 = Strongly disagree or there is no action on that matter

1 = Disagree or there is little action on the matter.

2 = Agree or there has been sufficient action on that matter.

3 = Somewhat agree or has there been good progress in that matter.

4 = Strongly agree or has performed excellently in that matte

9. Internal Control and Connected Transactions

9.1 Internal Control

The Company gives importance in the internal control system. The Board of Directors appoints the Audit Committee to an independent unit to support and implement on behalf of the Board of Directors as an important instrument of good corporate governance to ensure that the organizational operation is compliant to the requirements and code of conduct. The internal control system must be effective without conflict of interest and corruption. The Company manages on review and monitor of the internal control system by arranging sufficient personnel for implementing the internal control system and monitoring the operation of the Company and the subsidiaries to ensure that the Company and the subsidiaries have the internal control and internal audit systems which are efficient and effective.

In the Board of Directors meeting on on February 27,2024, 3 committees attended the meeting to consider and assess adequacy of the existing internal control systems of the Company and the subsidiaries by basing an assessment form on adequacy of the internal control system of the Securities and Exchange Commission, inquiry with the executives and relevant departments of the Company and the subsidiaries about the adequacy of the internal control system. The Board of Directors considered that the Company and the subsidiaries had the internal control and internal audit systems appropriate and adequate for the business size; able to protect assets of the Company and the subsidiaries from loss or taking advantages by unauthorized persons; able to significantly manage risk; and helpful for accounting and financial reports of the Company and the subsidiaries to be accurate with complete, sufficient, and reliable information disclosure. In addition, the executives and the employees of the Company and the subsidiaries operated work in compliance to the specified internal control system. Moreover, the ANS Audit Company Limited, the Company's auditor, gave opinions that no situations were found with weaknesses of the existing internal control system which might significantly affect the financial statements of the Company and the subsidiaries.

In addition, the Company resolved to appoint Ascent Advisory Company Limited to assess the internal control system by referring to the international standard of COSO 2013 (The Committee of Sponsoring Organization of Treadway Commission). The 2023 audit plan of the internal auditors is detailed as follows.

Audit Issues in Quarter 1/2023 are summarized below.

- Sales and payment system
- Product delivery system
- Follow up on the remaining issues from the last quarter report

Audit Issues in Quarter 2/2023 are summarized below.

- Quality Management Systems and Quality Systems
- Maintenance System
- Payment System
- Follow up on the remaining issues from the last quarter report

Audit Issues in Quarter 3/2023 are summarized below.

- Information technology system
- Human Resource Management System
- Follow up on the remaining issues from the last quarter report

Audit Issues in Quarter 4/2023 are summarized below.

- Budget management system
- Financial report system
- Follow up on the remaining issues from the last quarter report

Opinion of the Audit Committee for the Position of Internal Audit Supervisor

Mr. Niran Kongto assumed the position as Secretary of the Audit Committee and Internal Audit Manager which were appointed by the Audit Committee Meeting No. 2/2023 on Wednesday, May 10, 2023 as he has at least 12 years of experience working in auditing within private organizations, as well as having received training to increase skills and knowledge from the Association of Internal Auditors of Thailand and the Federation of Accounting Professions. In the course of internal audit, risk management, internal control, and understanding of the Company's activities and operations, it is deemed appropriate to perform such duties adequately. and at the Audit Committee Meeting No. 9/2022 on Wednesday, December 21, 2022. Resolved to appoint Ascent Advisory Company Limited to perform the duties of the Company's internal auditor. The reason for the increase in service fees for system audit work from the previous year is due to the economic situation and the rising cost of living. The internal control system adequacy assessment according to COSO 2013 is the same as the previous year because it is a continuous assessment, provided that the service fee is within the 2023 budget that has already been approved by the authority and does not exceed the budget.

9.2 Connected Transactions

Please refer to the section of financial statements in Note No. 4.

Part 3

Financial statement

SHUN THAI RUBBER GLOVES INDUSTRY PUBLIC COMPANY LIMITED AND ITS SUBSIDIARY
FINANCIAL STATEMENTS AND INDEPENDENT AUDITOR'S REPORT
FOR THE YEAR ENDED DECEMBER 31, 2023

Independent Auditor's Report**To the Shareholders and the Board of Directors of Shun Thai Rubber Gloves Industry Public Company Limited****Qualified Opinion**

I have audited the consolidated and separate financial statements of Shun Thai Rubber Gloves Industry Public Company Limited and its subsidiary, and of Shun Thai Rubber Gloves Industry Public Company Limited, respectively, which comprise the consolidated and separate statements of financial position as at December 31, 2023, the consolidated and separate statement of comprehensive income, the consolidated and separate statements of changes in shareholders' equity and the consolidated and separate statements of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In my opinion, except for the matter possibly affecting the financial statements as mentioned in the paragraph "Basis for Qualified Opinion", the accompanying consolidated and separate financial statements referred to above present fairly, in all material respects, the consolidated and separate financial position of Shun Thai Rubber Gloves Industry Public Company Limited and its subsidiary, and of Shun Thai Rubber Gloves Industry Public Company Limited, respectively, as at December 31, 2023, and their financial performance and cash flows for the year then ended, in accordance with Thai Financial Reporting Standards (TFRSs).

Basis for Qualified Opinion

As described in Notes to Financial Statements No 8 investment in subsidiaries included investment in AGM Recyclone (Thailand) Co Ltd. (AGM), which is a indirect subsidiary of the Company of Baht 18 million. The financial statement of AGM for the year 2023 and 2022 has not been provided and I was unable to satisfy myself by means of audit procedures for the financial position and operating results of such the Company. Therefore, I am unable to identify whether there is any necessary adjustment. In my opinion, the financial statement for December 31, 2023, is qualified in that matter.

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of my report. I am independent of the Group in accordance with the Code of Ethics for Professional Accountants including Independence Standards issued by the Federation of Accounting Professions (Code of Ethics for Professional Accountants) that are relevant to my audit of the financial statements, and I have fulfilled my other ethical responsibilities in accordance with the Code of Ethics for Professional Accountants. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my qualified opinion.

Emphasis of Matter

As described in notes to Financial Statements No 8, In 2016, The Company paid for the increased share capital of Baht 168.88 million while other shareholders in the subsidiary have not yet fully paid for their portions of the share capital. As at December 31, 2023, there is an outstanding share subscription receivable of Baht 179.45 million in the financial statements of the subsidiary.

Since the Company won the criminal case, in which it sued the offender on charges of providing false information to the official and notifying the official to record false information in the public document regarding the increase of the subsidiary's registered capital, on August 29, 2023, the Company initiated a civil lawsuit against the subsidiary, seeking court orders for the repayment of the increased share capital of Baht 168.88 million to the Company with interest, as well as repayment of indemnity for the loss of opportunity totaling of Baht 331.05 million.

On November 24, 2023, the Company and the subsidiary have reached a compromise agreement in the civil court. The subsidiary accepted the debt as indicated in the indictment and the subsidiary agrees to transfer its lands and buildings to the Company, as well as reduce its authorized share capital, and revise the list of shareholders to reflect the fact. Currently, the subsidiary is in the process of adhering to the terms of the compromise agreement.

However, my opinion is not modified in respect of the above matters.

Key Audit Matters

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the consolidated and separate financial statements of the current year. These matters were addressed in the context of my audit of the consolidated and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

Reversal of allowance for impairment of investments in subsidiaries (in Separate Financial Statements)

Risk

As described in Note to Financial Statements No. 8, in the separate financial statements, in 2023 the Company received the transfer the land and buildings for repayment of the increased share capital, including interest, indemnity for the loss of opportunity, by reaching into a compromise agreement in the court with subsidiary. The Company measures the fair value of the received transferred assets by relying on the appraisal value provided by an independent appraiser for the lands and the appraised value of an independent agency for buildings situated on the land, which closely corresponds to the valuation by an independent appraiser. The Company compares the fair value of the received transferred assets and the book value of the investments and other related assets. Since the fair value of the received transferred assets is higher than the book value of the net investment and other related assets, the Company reversed the allowance for impairment on investments in subsidiaries of Baht 24.28 million and recognized gain on the repayment of investments in the subsidiary of Baht 73.15 million.

I focused on this area because the value of reversal of allowance for impairment of investments in subsidiaries and gain on repayment of investments in the subsidiary are significant in the separate financial statements. The fair value of received transferred assets affects those transactions and the fair value involves the use of important judgments of independent appraisers and executives in considering the reasonableness of important assumptions used in the valuation of such assets.

Auditor's Response

I obtain an understanding about the consideration of the fair value of the received transferred assets and perform the following procedures:

- Understand and inquire from the management and legal consultant of the Company regarding conditions in a compromise agreement and related transaction.
- Verify the documents related to transferring land and buildings such as the memorandum of agreement for the transfer of debt repayment, land title deed, transfer fee receipt from the Land Department, and minutes of meetings of the Company and its subsidiaries.
- Understand and evaluate the appropriateness of methods used by management and the independent appraiser to assess the value of the subsidiary's land and building in accordance with financial reporting standards.
- Understand the assumptions which the appraiser uses that are reasonably comparable data, such as sale price comparisons of adjacent land as well as compare cost of construction with the appraised value from the announcement of the Values Association of Thailand.
- Compare the building value according to the independent appraiser's appraisal report with the appraisal value from independent agency to assess the appropriateness of the fair value of the building.
- Compare the fair value of transferred assets according to the independent appraiser's appraisal report with the book value of the investment and other related assets of the Company as at December 31, 2023.
- Observe the assets to prove their existence and are ready for use.

Valuation of investment properties and property, plant and equipment (in Consolidated Financial Statements)

Risk

As described in Note to financial statement No. 9, as at December 31, 2023, the allowance for impairment as presented in investment property of Baht 219.68 million, the Group assessed the allowance for impairment of investment properties account stated at cost method by considering the recoverable amount based on appraisal value by an independent appraiser less cost to sales.

As described in Note to financial statement No. 10, as at December 31, 2023, the allowance for impairment as presented in property plant and equipment of 107.66 million, the Company measures land in property, plant and equipment account at the revalued amount based on appraisal value by an independent appraiser and the Company assessed the allowance for impairment of building and equipment as presented in property plant and equipment account stated at cost method by considering the recoverable amount based on appraisal value by an independent appraiser less cost to sales.

I focused on this area because of the allowance for impairment of investment properties and property plant and equipment are significant in the consolidated financial statements. This also involves the use of important judgments of independent appraisers and executives in considering the reasonableness of key assumptions used in the valuation of such assets.

Auditor's Response

I obtain an understanding for measurement of investment properties and property, plant and equipment and perform audit procedures the following:

- A consideration of related internal and external information to assess whether there are any indicators of impairment of investment properties and property plant and equipment and an analysis of information related to the asset's fair value less costs to sell and its value in use.
- A review of the basis applied in determining impairment of investment properties, the consistency of the application of that basis, and the rationale for the recording of impairment.
- Understand and evaluate the appropriateness of the methods that the independent appraiser assesses the value of investment properties and property, plant and equipment to be in accordance with financial reporting standards.
- Understand the assumptions that the appraiser uses that are reasonably comparable data, such as sale price comparisons of adjacent land as well as compare the cost of construction with the appraised value from the announcement of the Values Association of Thailand.
- In addition, I assessed the disclosure of information by the Group's management with respect to assessment of impairment of investment property and property plant and equipment

Other information

Management is responsible for the other information. The other information comprises the information include in Annual Report, but does not include the consolidated and separate financial statements and my auditor's report thereon. The Annual Report for the year is expected to be made available to me after the date of this auditor's report.

My opinion on the financial statements does not cover the other information and I do not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or my knowledge obtained in the audit or otherwise appears to be materially misstated.

When I read the Annual Report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance for correction of the misstatement.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with TFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence

obtained up to the date of my auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. I am responsible for the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, I determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

SHUN THAI RUBBER GLOVES INDUSTRY PUBLIC COMPANY LIMITED AND ITS SUBSIDIARY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2023

1. GENERAL INFORMATION

Shun Thai Rubber Gloves Industry Public Company Limited (“the Company”) was incorporated as a limited company in Thailand on May 24, 1988 and converted to a Public Company on September 4, 2001, which was also the date that the Company’s common shares were approved as listed securities on the Stock Exchange of Thailand. The registered office of the Company is at No.1, Promphan Tower 2, Room No. 608, 6th Floor, Soi Lat Phrao 3, Chom Phon, Chatuchak, Bangkok. Factory is located at No. 9, 14, 52/18, 52/19 Moo 4, Tambon Kached, Amphur Muang, Rayong Province.

The Company mainly engages in the manufacture and distribution of rubber gloves.

2. BASIS FOR THE PREPARATION OF THE FINANCIAL STATEMENTS

The accompanying financial statements are prepared in accordance with Thai Financial Reporting Standards (“TFRS”) including related interpretations and guidelines promulgated by the Federation of Accounting Professions (“FAP”) and applicable rules and regulations of the Thai Securities and Exchange Commission.

Presentation of the financial statements complies with Notification of the Department of Business Development, dated December 26, 2019, issued under the Accounting Act B.E. 2543.

The accompanying financial statements have been prepared in Thai language and expressed in Thai Baht. Such financial statements have been prepared for domestic reporting purposes. For the convenience of the readers not conversant with the Thai language, an English version of the financial statements has been provided, translated based on the Thai version.

The financial statements have been prepared on a historical cost basis, except where otherwise disclosed in the accounting policies.

Preparation of the financial statements in conformity with Thai Financial Reporting Standards (“TFRS”) requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying amounts of assets and liabilities that are not readily apparent from other sources. Subsequent actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised, if the revision affects only that period, and in the period of the revision and future periods, if the revision affects both current and future periods.

Basis for preparation of the consolidated financial statements

- a) The consolidated financial statements included the financial statements of Shun Thai Rubber Gloves Industry Public Company Limited and its subsidiary (that together referred to as “the Group”).

The details of the Company’s subsidiary as at December 31, 2023 and 2022 are as follows:

Company’s name	Nature of business	Percentage of shareholding	
		2023	2022
<u>Subsidiary</u>			
Northtern Renewable Energy Co., Ltd.	Manufacture and distribution of biomass energy solution and power generation from biomass and waste (temporary cease operation)	48.25	48.25
<u>Subsidiary shareholding by Northtern Renewable Energy Co., Ltd.</u>			
AGM Recyclone (Thailand) Co., Ltd.	Transfrom biomass to renewable energy and anufacture power friendly generation (temporary cease operation)	99.99	99.99

- b) The financial statements of the subsidiary are included in the consolidated financial statements from the date that control commences until the date that control ceases.
- c) The financial statements of the subsidiary are prepared using the same significant accounting policies as the Company.
- d) The balances between the Company and its subsidiary, and significant intercompany transactions have been eliminated in the consolidated financial statements.

The financial statements of Northern Renewable Energy Co., Ltd. are included in the consolidated financial statements because the Company has power to control over their financial and operating policies, even though the Company’s shareholding less than 50 percent, therefore, they are regarded as subsidiary company.

Non-controlling interests represent the portion of profit or loss and net assets of the subsidiary that are not belong to the Company and are presented separately in the consolidated statement of comprehensive income, and within equity in the consolidated statement of financial position.

The separate financial statements, which present investments in subsidiary under the cost method, have been prepared solely for the benefit of the public.

New financial reporting standards

a) Financial reporting standards that became effective in the current year

During the year, the Group has adopted the revised financial reporting standards and interpretations which are effective for fiscal years beginning on or after January 1, 2023. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards clarifying accounting treatment and providing accounting guidance for users of the standards.

The adoption of these financial reporting standards does not have any significant impact on the Group's financial statements.

b) Financial reporting standards that will become effective for fiscal years beginning on or after January 1, 2024

The Federation of Accounting Professions issued a number of revised financial reporting standards, which are effective for fiscal years beginning on or after January 1, 2024. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards clarifying accounting treatment, providing accounting guidance for users of the standards and amendments due to TFRS 17 Insurance Contracts.

The management of the Group believes that adoption of these amendments will not have any significant impact on the Group's financial statements.

3. SIGNIFICANT ACCOUNTING POLICIES

Revenues and expenses recognition

Revenue from sale

Revenue from sale of goods is recognized at the point in time when control of the asset is transferred to the customer, generally on delivery of the goods. Revenue is measured at the amount of the consideration received or receivable, excluding value added tax of goods supplied after deducting returns, discounts, allowances and price promotions to customers.

Other revenues and expenses

The Group recognized revenues and expenses on an accrual basis.

Cash and Cash Equivalents

Cash on hand is kept for general use purposes within the Group. Cash equivalents are savings deposits and current accounts, highly liquid investments that are readily convertible to known amounts of cash that are subject to an insignificant risk of change in value.

Trade receivables

Trade receivables are amounts due from customers for goods sold or service performed in the ordinary course of business.

Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognized at present value.

The Group applies simplified approach to measure expected credit losses which calculated based on its historical credit loss experience and consider for forward-looking information specific to the debtors and the economic environment. The simplified approach requires expected lifetime losses to be recognized from initial recognition of the receivables.

Financial assets and financial liabilities

Classification and measurement of financial assets and financial liabilities

Classification

The classification of financial assets depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows of financial assets.

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss); and
- those to be measured at amortised cost.

The Group reclassifies debt instruments when and only when the Group change its business model for managing those assets.

The equity instruments held must be irrevocably classified to two measurement categories; i) at fair value through profit or loss (FVPL), or ii) at fair value through other comprehensive income (FVOCI) without recycling to profit or loss.

Measurement

At initial recognition, where a financial asset is not at FVPL, the Group measures the financial asset at its fair value plus or minus transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

There are three measurement categories into which the Group classifies its debt instruments:

- *Amortised cost:* A financial asset will be measured at amortised cost when the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows. In addition, the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Interest income from these financial assets is included in financial income using the effective interest rate method. Any gain or loss arising on derecognition is recognized directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented in profit or loss.

- *FVOCI*: A financial asset will be measured at FVOCI when it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets. In addition, the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Movements in the carrying amount are taken through other comprehensive income, except for the recognition of impairment gains or losses, interest income and related foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss and recognised on other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as separate line item in the statement of comprehensive income.
- *FVPL*: A asset that does not meet the criteria for amortised cost or FVOCI is measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises.

Equity instruments shall be subsequently measured at fair value and the fair value change is to be recognised through profit or loss or other comprehensive income depending on the classification of such equity instrument.

Derivatives are classified and measured at fair value through profit or loss except derivatives for hedge.

Dividends from such investments continue to be recognised in profit or loss when the Group's right to receive payments is established.

Impairment

Expected credit losses associated with financial assets carried at amortized cost and FVOCI, and assets from loan commitments and financial guarantees, are assessed without the increases in credit risk. The Group applies the general approach to the measurement of expected credit losses. In the case of trade receivables, however, the Group applies the simplified approach to measure expected credit losses.

Inventory

Inventories are stated at the lower of cost or net realizable value, by using the following methods:

Finished goods and work in process	-	at first-in, first-out method
Raw materials and factory supplies	-	at average cost method

Cost comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of overheads based on operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

Investments in subsidiary

Investment in subsidiary is applied by using the cost method less allowance for impairment losses (if any) in the separate financial statements.

Investment properties

Investment properties are properties which are held to earn rental income, for capital appreciation or for both, but not for sale in ordinary course of business, for the production or supply of goods or services or for administrative purposes.

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and provision for impairment (if any).

Depreciation of investment properties is calculated by reference to their costs on the straight-line basis over estimated useful lives of 3 - 20 years.

Depreciation of the investment properties is included in determining operation performance.

No depreciation is provided on land.

On disposal of investment properties, the Group recognized the difference between the net disposal proceeds and the carrying amount of the asset profit or loss in the period when the asset is derecognized.

Property, Plant and Equipment

Land and land improvements are stated at revalued amounts. Revaluations are performed with sufficient regularity by an independent professional valuator with to ensure that the carrying amount of these assets does not differ materially from that which would be determined using fair values at the financial reporting date.

Buildings and equipment are stated at cost less accumulated depreciation and allowance for impairment losses (if any). When assets are sold or retired, their cost and accumulated depreciations are eliminated from the accounts and any gain or loss resulting from their disposal is included in statement of profit or loss.

The Group records the differences incurred from revaluation as follows:

- When an asset's carrying amount is increased as a result of a revaluation, the increase is recognized in other comprehensive income and accumulated in equity under the heading "Revaluation surplus of fixed assets". However, the increase is recognized in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognized in profit or loss.
- When an asset's carrying amount is decreased as a result of a revaluation, the decrease is recognized in profit or loss. However, the decrease is recognized in other comprehensive income to the extent of any credit balance existing in the revaluation surplus in respect of that asset. The decrease recognized in other comprehensive income reduces the amount accumulated in equity under the heading "Revaluation surplus of fixed assets".

The revaluation surplus of fixed assets is not available for dividend distribution.

Upon the disposal of the revalued property, plant and equipment, the relevant portion of the revaluation surplus realized in respect of the previous valuation is released from the property, plant and equipment valuation surplus directly to retained earnings or deficit.

Depreciation

Depreciation of plant and equipment is calculated according to the straight-line basis over the following estimated useful lives:

	Useful lives (Years)
Land improvements	20
Buildings and building improvements	5 to 20
Machinery and equipment	2 to 20
Furniture, fixtures and office equipment	3 to 10
Vehicles	5

Intangible assets

Computer Software

Computer software acquired by the Group is stated at cost less accumulated amortization and allowance for impairment losses (if any).

Amortization

Amortization of computer software is calculated by reference to its costs on a straight-line basis for the periods of 3 to 5 years.

Impairment of non-financial assets

The Group reviews the impairment of assets whenever events or changes in circumstances indicate that the recoverable amount (the higher of the asset's selling price or value in use) of assets is below the carrying amount. The review is made for individual assets or for the cash-generating unit.

If the carrying value of an asset exceeds its recoverable amount, the Group recognizes the impairment losses by reducing the carrying value of the asset to its recoverable amount and recording the devaluation in profit or loss or reducing revaluation increment in assets in case that those assets were previously revalued. The reversal of impairment loss recognized in prior years is recorded as part of other income or as a revaluation increments in assets when there is an indication that the impairment losses recognized for the assets no longer exist or are decreased. Such a reversal should not exceed the carrying amount that would have been determined (net of the associated depreciation or amortization).

Leases

Leases - where the Group is the lessee

At inception of a contract, the Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group recognizes right-of-use asset and lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, initial direct costs and estimated costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any incentive received.

The lease liability is initially measured at the present value by discounting lease payments that are not paid at the commencement date using the interest rate implicit in the lease, if the rate can be readily determined. If that rate cannot be readily determined, the Group uses the Group's incremental borrowing rate.

Lease payments included in the measurement of the lease liability are as follows:

- Fixed payments including in-substance fixed payments;
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- Amounts expected to be payable under a residual value guarantee;
- The exercise price, under a purchase option that the Group is reasonably certain to exercise, whereby the exercise price is considered as lease payments in an optional renewal period; and
- Payments of penalties for early termination of a lease if the Group is reasonably certain to terminate early.

To apply a cost model, the Group measures the ROU asset at cost, less accumulated depreciation and accumulated impairment loss and then makes adjustments for any remeasurement of the lease liability. The ROU asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the ROU asset or the end of the lease term. However, if the lease transfers ownership of the underlying asset to the Group by the end of the lease term or if the cost of the ROU asset reflects that the Group will exercise a purchase option, the Group depreciates the ROU asset from the commencement date to the end of the useful life of the underlying asset. The useful life of the ROU asset is determined on the same basis as those of property, plant and equipment.

Depreciation of right of use assets is calculated by reference to their cost on the straight – line basis over the shorter of their estimated useful lives and the lease term. The estimated useful lives are 2 years.

The lease liability is re-measured when there is a change in future lease payments arising from the following:

- A change in an index or a rate used to determine those payments
- A change in the Group's estimate of the amount expected to be payable under a residual value guarantee
- The Group changes its assessment of whether it will exercise a purchase, extension or termination option

When the lease liability is re-measured to reflect changes to the lease payments, the Group recognises the amount of the remeasurement of the lease liability as an adjustment to the ROU asset. However, if the carrying amount of the ROU asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Group recognises any remaining amount of the remeasurement in profit or loss.

Short-term leases and leases of low-value assets

The Group has elected not to recognise ROU assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

Related party transactions

Related parties comprise enterprises and individuals that control, or are controlled by the Group, whether directly or indirectly, or which are under common control with the Group.

They also include associated companies and individuals which directly or indirectly own a voting interest in the Group that gives them significant influence over the Group, key management personnel, directors and officers of the Group and close members of the family of these individuals and companies associated with these individuals also constitute related parties.

In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

Business combinations

The Group applies the acquisition method for all business combinations when control is transferred to the Group other than those with entities under common control.

The acquisition date is the date on which control is transferred to the acquirer. Judgment is applied in determining the acquisition date and determining whether control is transferred from one party to another.

In a business combination achieved in stages, the Group shall remeasure its previously held equity interest in the acquiree to its acquisition-date fair value and recognize the resulting gain or loss in profit or loss.

Goodwill is measured as the fair value of the consideration transferred including the recognized amount of any non-controlling interest in the acquiree, less the fair value amount of the identifiable assets acquired and liabilities assumed, all measured as of the acquisition date. Any gain on bargain purchase is recognized in profit for the period immediately.

Consideration transferred includes the fair values of the assets transferred, liabilities incurred by the Group to the previous owners of the acquiree, and equity interests issued by the Group. Consideration transferred also includes the fair value of any contingent consideration and share-based payment awards of the acquiree that are replaced mandatorily in the business combination.

A contingent liability of the acquiree is assumed in a business combination only if such a liability represents a present obligation and arises from a past event, and its fair value can be measured reliably.

Transaction costs that the Group incurs in connection with a business combination, such as legal fees, and other professional and consulting fees are expensed as incurred.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period, or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date.

Foreign Currency Transactions

Foreign currency transactions are accounted for at the exchange rates prevailing on the date of the transactions. Monetary assets and liabilities at the statement of financial position dates denominated in foreign currencies are translated into Baht at the rates prevailing on the transaction dates. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in the statements of comprehensive income as incurred.

Provision

A provision is recognized when the Group has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. A provision is reviewed at the statement of financial position date and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Employee Benefits

Short-term benefits

The Group recognizes salaries, wages, bonuses and social security contributions as expenses on an accrual basis.

Post-employment benefits

(A) Defined contribution plans

The Group and their employees have jointly established a provident fund. The fund is monthly contributed by employees and by the Group. The fund's assets are held in a separate trust fund and the Group's contributions are recognized as expenses when incurred.

(B) Defined benefit plans and other long-term employee benefits

The employee benefit obligation for severance payment under labor law is recognized as a charge to results of operations over the employee's service period. It is calculated by estimating the amount of future benefit earned by employees in return for service provided to the Group in the current and future periods, with such benefit being discounted to determine the present value. The reference point for setting the discount rate is the yield rate of government bonds as at the reporting date. The calculation is performed by actuarial technique using the Projected Unit Credit Method.

Actuarial gains and losses arising from post-employment benefits are recognized immediately in the other comprehensive income and actuarial gains and losses arising from other long-term employee benefits are recognized immediately in the profit or loss.

Finance Costs

Interest expenses and similar costs are charged to the statement of profit or loss for the year in which they are incurred, except to the extent that they are capitalized as being directly attributable to the acquisition, construction or production of an asset which necessarily takes a substantial period of time to be prepared for its intended use or sale. The interest component of finance lease payments is recognized in the statement of profit or loss using the effective interest rate method.

Income Tax

Income tax expenses represent the sum of corporate income tax currently payable and deferred tax.

Current tax

The Group records current income tax at the amount expected to be paid to the taxation authorities, based on taxable profits determined in accordance with tax legislation.

Deferred tax

The Group recognizes deferred income tax on temporary differences between the tax bases of assets and liabilities and their carrying amounts at the end of each reporting period, using the tax rates enacted at the end of the reporting period.

The Group recognizes deferred tax liabilities for all taxable temporary differences while it recognizes deferred tax assets for all deductible temporary differences and tax losses carried forward to the extent that it is probable that future taxable profit will be available against which such deductible temporary differences and tax losses carried forward can be utilized.

At each reporting date, the Group reviews and reduces the carrying amount of deferred tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

The Group records deferred tax directly to shareholders' equity if the tax relates to items that are recorded directly to shareholders' equity.

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between buyer and seller (market participants) at the measurement date. The Group apply a quoted market price in an active market to measure their assets and liabilities that are required to be measured at fair value by relevant financial reporting standards. Except in case of no active market of an identical asset or liability or when a quoted market price is not available, the Group measure fair value using valuation technique that are appropriate in the circumstances and maximizes the use of relevant observable inputs related to assets and liabilities that are required to be measured at fair value.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy into three levels based on categories of input to be used in fair value measurement as follows:

- Level 1 Use of quoted market prices in an observable active market for such assets or liabilities
- Level 2 Use of other observable inputs for such assets or liabilities, whether directly or indirectly
- Level 3 Use of unobservable inputs such as estimates of future cash flows

At the end of each reporting period, the Group determine whether transfers have occurred between levels within the fair value hierarchy for assets and liabilities held at the end of the reporting period that are measured at fair value on a recurring basis.

Basic earnings per share

Basic earnings per share are computed by dividing net profit for the years by the weighted average number of common shares outstanding during the years.

Significant accounting judgments and estimates

The preparation of the financial statements in conformity with Thai Financial Reporting Standard requires management to make judgments and estimates. Judgments and estimations will affect the amounts in the financial statements and the information presented in the Notes to financial statements. Actual results may differ from these judgments and estimates. Significant judgments and estimates are as follows:

Allowance for expected credit losses of trade receivables

In determining an allowance for expected credit losses of trade receivables, the management needs to make judgement and estimates based upon, among other things, past collection history, aging profile of outstanding debts and the forecast economic condition for groupings of various customer segments with similar credit risks. The Group's historical credit loss experience and forecast economic conditions may also not be representative of whether a customer will actually default in the future.

Impairment of investment in subsidiasy

The Company treats investments in subsidiasy as impaired when there has been a significant or prolonged decline in the fair value below its cost or where other objective evidence of impairment exists. The determination of what is "significant" or "prolonged" requires judgment of the management.

Property, plant and equipment and depreciation

In determining depreciation of plant and equipment, the management is required to make estimates of the useful lives and residual values of the plant and equipment and to review estimate useful lives and residual values when there are any changes.

In addition, the management is required to review property, plant and equipment for impairment on a periodic basis and record impairment losses when it is determined that their recoverable amount is lower than the carrying amount. This requires judgment regarding forecast of future revenues and expenses relating to the assets subject to the review.

Deferred tax assets

Deferred tax assets are recognized in respect of temporary differences only to the extent that it is probable that taxable profit will be available against which these differences can be utilized. Significant judgment by management is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and level of estimate future profits.

Post-employment benefits under defined benefit plans

The obligation under the defined benefit plan is determined based on actuarial techniques. Such determination is made based on various assumptions, including discount rate, future salary increase rate, mortality rate and staff turnover rate.

Provisions

Provisions are recognized when the Group has a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

Long-term loan to subsidiary

On September 23, 2021, the Company renewed the short-term loan agreement with the subsidiary for another year, using land and buildings as collateral. The interest rate is 6.97 % per annum. The agreement expired on September 23, 2022. Subsequently, the subsidiary submitted a repayment extension request letter, dated February 7, 2023, to extend loan repayment for another two years, or until September 23, 2024. The subsidiary, in said letter, also requested waiver of the default interest rate from September 23, 2022, onward. The subsidiary will pay interest of Baht 0.56 million, which accrued from September 23, 2020 (effective date) to September 22, 2022.

On February 25, 2023, the Company's Board of Directors' Meeting resolved that the subsidiary paid accrued interest of Baht 0.56 million on March 3, 2023. The Company also resolved to extend maturity of the loan and interest to September 23, 2023, but shall reserve the right to charge interest at the default rate and enforce the collateral property. The subsidiary provided The Debt Acknowledgement Letter, dated March 7, 2023, stating the aforementioned condition. On the maturity date of the loan repayment, the subsidiary was unable to repay of the loan.

Other non-current receivable

On July 18, 2022, the Company paid a judgment creditor of the subsidiary in Baht 8 million. Then, the Company received transferring all of the right to claim amount of Baht 8.59 million (consisting of a principle of Baht 7.20 million with the interest of Baht 1.39 million).

The transfer of rights has been presented as other non - current receivable and charged interest at the rate of 7.50% (the judgment rate) for the principal amount of Baht of 7.20 million.

On November 24, 2023, the Company and its subsidiary entered into a compromise agreement in court as a form of dispute resolution. Under the terms of agreement, the subsidiary agrees to transfer the ownership of lands and buildings to the Company. In exchange, the Company agrees to waive the right to claim under loan agreements dated September 23, 2021, the Debt Acknowledgement Letter dated March 7, 2023, and the assignment dated July 18, 2022. (Note 8)

The Company recognized other receivables of Baht 9.06 million from the advance payment made for the transfer of land and buildings on behalf of the subsidiary. The management has considered the ability and opportunity to receive repayment found that the subsidiary does not have sufficient cash flow, so it has considered setting aside the entire amount allowance for credit losses.

The subsidiary entered into short-term borrowing agreements with related person are due at call without collateral. The loan bears interest at 6.25% per annum and is due for repayment at call.

Northern Renewable Energy Co., Ltd. (Subsidiary) entered into short-term loan agreements with AGM Recyclone (Thailand) Co., Ltd. in total amount of Baht 9.17 million. This is due at call without collateral. The loan bears interest at the rate of 6.25% per annum. As AGM Recyclone (Thailand) Co., Ltd. temporary cease operation, the subsidiary's management provide full allowance for credit loss - loans to and accrued interest income of Baht 10.39 million.

The Company purchases the assets from related companies according to mutually agreed price.

In 2016, The Company paid for the increased share capital in the subsidiary in the amount of Baht 168.88 million. Currently, other shareholders in the subsidiary have not paid the full value of the shares. There was share subscription receivable outstanding on the financial statements of the subsidiary amounting to Baht 179.45 million but the offender had submitted the list of shareholders to the Department of Business Development, indicating that all subsidiary shareholders had fully paid for the increased share capital. On February 19, 2021, the Company filed a lawsuit against the offender in the criminal case on charges of providing false information to the official and notifying the official to record false information in the public document to the Bangkok North Municipal Court and the Dusit Municipal Court. On June 23, 2023, and October 26, 2023, the Bangkok North Municipal Court and the Dusit Municipal Court ruled in favor of the Company, and the cases are now considered final.

On August 29, 2023, the Company initiated a civil lawsuit against the subsidiary, seeking the following court orders:

- Repayment of the increased share capital amounting to Baht 168.88 million to the Company. Interest on this amount will be calculated at a rate of 7.5% per annum from May 19, 2016 (the date when the subsidiary received the increased share capital payment from the Company) to April 10, 2021. Subsequently, interest will be calculated at a rate of 5% per annum from April 11, 2021, until the full repayment date.
- Payment of indemnity for the loss of opportunity to earn income from the aforementioned increased share capital payment, totaling Baht 80.00 million, with interest at a rate of 5% per annum from August 29, 2023 (the lawsuit filing date) until full repayment.
- Reduction of authorized share capital.
- Revision of the list of shareholders to be consistent with the fact.

On November 24, 2023, the Company and the subsidiary have reached a compromise agreement in the civil court. The subsidiary accepted that debt as indicated on the indictment. The total debt of Baht 331.05 million as of the compromise agreement date. As part of dispute resolution, the subsidiary agrees to process the following:

- Registered and transferred ownership of 5 plots of land and buildings which have a net book value of Baht 245.82 million to the Company within 30 days from the date of making a compromise agreement. All expenses incurred in this process will be the responsibility of the subsidiary.
- Decreased the registered amount by Baht 168.88 million, updated the shareholder register, issued new share certificate and amended the list of shareholders within 4 months from the date of the subsidiary completes the registration of transfer for all the lands and buildings.

When the subsidiary company has fully complied with the term of the compromise agreement, the Company agrees to waive the right to claim under all claims in the civil case with the term of dated August 29, 2023, regarding the increased share capital, claims under the loan contract dated September 23, 2021, debt acknowledgment letter dated March 7, 2023, and claim transfer agreement dated July 18, 2022. (Note 4)

On December 19, 2023, and December 21, 2023, the subsidiary transferred 4 plots of land with buildings to the Company. There is still a plot of land remaining with a fair value of Baht 3.83 million that cannot yet be transferred due to transfer restrictions according to Section 58 bis of the Land Code. Land is due to be able to transfer ownership in September 2024. Expenses for transferring land and buildings were paid by the Company on behalf of the subsidiary in the amount of Baht 9.06 million which is recognized as non-current receivables and fully provided an allowance for credit losses. At present, the subsidiary is still in the process of registering a capital reduction.

In the separate financial statements, the Company recognized the transfer of land and buildings in the investment property and reversed the related assets. The repayment of the increased share capital is recognized as a liability from the transfer of assets for repayment of an investment presented by netting off with an investment. The liability from the transfer of assets for repayment of an investment will be reversed when the subsidiary has completely registered to reduce authorized share capital. The difference between these transactions was presented as a gain on the repayment of investments in the subsidiary as follows:

	Unit: Thousands Baht
Liabilities from the transfer of assets for repayment of	
an investment	168,875
Long-term loan and accrued interest	4,353

Total cost	-	255,740	-	255,740
Net book value	-			255,740

According to the terms of the compromise agreement, the Company received the transfer of 5 plots of land and buildings with a fair value of Baht 213.06 million and of Baht 42.68 million, respectively. Currently only a plot of land has not yet been transferred. The Company recognized these land and buildings as investment property in the separate financial statements (Note 8). In addition, the Group management considers that there were no remaining recoverable value of machinery and other assets with a book value of Baht 29.04 million, therefore, the Group recognized an impairment loss of Baht 29.04 million in the consolidated financial statement.

In 2022, the Subsidiary arranged for independent professional appraisers to appraise the value of certain assets according to the report dated on December 21, 2022. The fair values (categorized as Level 2 fair value) and the basis of the revaluation were as follows:

Assets	The basis of the revaluation	Unit: thousand
		Baht
		2022
Land and land improvements	Land and land improvements were revalued using the market approach. Sales prices of comparable properties in close proximity are adjusted for differences in key attributes such as spaces, location, environment, and highest best use. The most significant input into this valuation approach is price per Rai and size of land.	264,913

Assets	The basis of the revaluation	Unit: thousand
		Baht
		2022
Building	The valuation of buildings and structures by new replacement cost is calculated from construction prices in the market to build the similar characteristics of properties in close proximity and adjusted for depreciation which calculated from utilised period and remaining expected useful lives. The most significant input into this valuation approach is construction price per square meter, utility spaces and useful lives of buildings.	49,485
Machine	The valuation of machinery and equipment by new replacement cost is an estimate of the cost of new machinery to be brought to replace deducted by physical depreciation, functional depreciation, and economic obsolescence. The Fair Market Value is calculated based on the New Replacement Cost minus the total depreciation. The assumptions of the valuation of the machinery are made based on the Company's purchasing documents (if any) and market information, the market comparative price inquired from the vendors or sales agents, and the previous data of the independent appraisers from the appraisal of machinery in the same category.	13,412

According to appraisal of assets during 2022, the Group reversed loss on impairment of land of Baht 29.65 million and recognized impairment loss of factory and building of Baht 11.19 million in the consolidated statement of comprehensive income in 2022.

As at December 31, 2023 and 2022, all of the Company's land, buildings and improvements that exist or that are to be constructed thereon including a portion of machinery and equipment are mortgaged/pledged as collateral for credit facilities from several local banks (Note 22.1.)

In 2022, the Company arranged for independent professional appraisers to appraise the value of certain assets. The fair value has been categorized as Level 2 fair value and the basis of the revaluation of property plant and equipment is the same as the basis of the revaluation of investment properties. (Note 9)

As at December 31, 2023 and 2022, the Group had revaluation surplus land and land improvements presented in other components of shareholder's equity net tax of Baht 24.68 million and Baht 24.68 million, respectively.

According to appraisal of assets during 2022, there is charging in valuation of property plant and equipment, which affect the financial statements as follows:

- The fair value of land increased in the amount of Baht 0.92 million, which is recognized in the revaluation surplus account as presented in other components of shareholders' equity.
- Buildings and structures was revaluated in 2022 and the recoverable amount was higher than the carrying value, therefore, the Company reversed the allowance for impairment in the amount of Baht 11.85 million and recognized the amount in the statement of comprehensive income.
- The impairment for machine and equipment charges of Baht 56.80 million, was made as a result of the carrying values higher than the recoverable amount (value in use or fair value less cost to sell). The recoverable amount was determined from the fair value which was appraised by the management's expert less cost to sell. The company recognized impairment loss in the statement of comprehensive income.

As at December 31, 2023 and 2022, the Company's buildings and equipment at cost amounting to Baht 536.18 million and Baht 510.63 million, respectively, are fully depreciated but still in use.

11. INTANGIBLE ASSETS

Intangible assets as at December 31, 2023 consisted of:

	Unit: Thousand Baht				As at December 31, 2023
	Consolidated Financial Statements/ Separate Financial Statements				
	As at January 1, 2023	Increase	Decrease	Transfer in/(out)

Total trade and other current payables	48,825	71,513	23,558	46,970

Due to the short-term nature of trade and other current payables, there carrying amount is considered to be the same as their fair value.

14. NON-CURRENT PROVISIONS FOR EMPLOYEE BENEFIT

Movement of the present value of non-current provisions for employee benefits for the years ended December 31, 2023 and 2022, as follows:

	Unit: Thousands Baht			
	Consolidated Financial Statements		Separate Financial Statements	
	2023	2022	2023	2022
Non-current provisions for				
employee benefit at beginning of year	5,279	6,471	5,279	6,471
Include in profit or loss:				
Current service cost	495	628	495	628
Interest cost	158	95	158	95
Loss on settlement	1,949	3,533	1,949	3,533
Include in other comprehensive income:				
Actuarial (gain) losses arising from				
Financial assumptions changes	-	(1,069)	-	(1,069)
Demographic assumptions changes	-	547	-	547
Experience adjustments	-	(1,371)	-	(1,371)
Benefit paid during the year	(2,560)	(3,555)	(2,560)	(3,555)
Non-current provisions for				
employee benefit at ending of year	5,321	5,279	5,321	5,279

Employee benefit expenses in profit or loss for the the years ended December 31, 2023 and 2022, were as follows:

	Unit: Thousands Baht			
	Consolidated Financial Statements /Separate Financial Statements			
	2023	2022	2023	2022
Cost of sales	1,803	4,043	1,803	4,043
Selling and Administrative expenses	799	213	799	213
Total employee benefit expenses	2,602	4,256	2,602	4,256

The actuarial assumption of discount rate is estimated from weighted average of yield rate of government bonds as at the end of reporting date that reflects the estimated timing of benefit payments.

The actuarial assumption of mortality rate for reasonable estimation of probability of retirement in the future is estimated from the mortality table.

Principal actuarial assumptions as at December 31, 2023 and 2022, (represented by the weighted-average) consisted of:

	Percentage/annum	
	Consolidated Financial Statements / Separate Financial Statements	
	2023	2022
Discount rate	3.08	3.06
Salary increase rate	3.00	3.00
Mortality	100% of Thai Mortality Ordinary Tables of 2017	
Turnover rate		
Under 31 years old	24.00	24.00
31 - 40 years old	14.00	14.00
41 - 50 years old	14.00	14.00
Above 51 years old	0.00	0.00

The result of sensitivity analysis for significant assumptions that affect the present value of the non-current provisions for employee benefit as at December 31, 2023 are summarized below:

	Unit: Thousands Baht	
	Consolidated Financial Statements /	
	Separate Financial Statements	
	Increase 1%	Decrease 1%
Discount rate	(673)	787
Salary increase rate	844	(640)
Turnover rate	(47)	48

As at December 31, 2023, the weighted average duration of the liabilities for long-term employee benefit of the Company is 15 years (2022: 15 years)

As at December 31, 2023, the maturity analysis of undiscounted cash flows of benefit payments was as follows:

	Unit: Thousands Baht
With in 1 year	113
Over 1 and up to 5 years	648
Over 5 years	21,880

Basic loss per share (Baht)	(0.071)	(0.045)	(0.003)	(0.048)

20. OPERATING SEGMENTS

The Company is engaged in the production and distribution of rubber gloves and its subsidiary engaged in the production and distribution of biomass fuel. Therefore, revenue, profit (loss) and assets reflected in the financial statements are related to the business segments as discussed.

The Group's operations sales portions by geographical segments for the years ended December 31, 2023 and 2022, were as follows:

	(Percentage of total net sales)			
	Consolidated Financial Statements		Separate Financial Statements	
	2023	2022	2023	2022
Net foreign sales	59.40	61.35	59.40	61.35
Net domestic sales	40.60	38.65	40.60	38.65
Total	100.00	100.00	100.00	100.00

The Group's operations sales portions by type of customer for the years ended December 31, 2023 and 2022, were as follows:

	Unit: Thousands Baht			
	Consolidated Financial Statements		Separate Financial Statements	
	2023	2022	2023	2022
Net individual sales	6,927	19,838	6,919	19,828
Net corporate sales	380,873	630,928	380,873	630,916
Total	387,800	650,766	387,792	650,744

21. PROVIDENT FUND

The Company has established a contributory registered provident fund in accordance with the Provident Fund Act B.E. 2530 and based on the approval from the Ministry of Finance on April 23, 2004. Under the plan, members and the Company contribute to the fund at 3% of the employees' basic salaries. The Company appointed a fund manager to manage the fund in accordance with the terms and conditions prescribed in the Ministerial Regulation No. 2 (B.E. 2532) issued under the Provident Fund Act B.E. 2530.

Provident fund contributions made by the Company for its employees and recorded as expense in profit or loss for the years ended December 31, 2023 and 2022 of Baht 0.39 million and Baht 0.46 million, respectively.

22. COMMITMENTS AND CONTINGENT LIABILITIES

- 22.1. As at December 31, 2023, the Company obtained credit facilities (short-term borrowings, bank overdraft, forward contracts, bank guarantees, and liabilities under packing credit) from two local banks totaling Baht 162.85 million. The loans bear interest at the MOR and MLR per annum. These credit facilities are collateralized by a pledge of the Company's fixed deposits and mortgage/pledge of the Company's land, buildings and improvements that exist or are to be constructed thereafter, and a portion of machinery and equipment as described in Note 10 to the financial statements. Moreover, the loan agreements contain conditions and restrictions, such as not to create an additional pledge on those assets, etc.
- 22.2. As at December 31, 2023, the Company obtained letters of guarantee issued by a local bank amounting to Baht 2.85 million guaranteed by a pledge of deposits with financial institutions.
- 22.3. As at December 31, 2023, the Company had capital expenditure contracted as at the statement of financial position date but not recognized in the financial statements is as follows:

	Unit: Million Baht
ERP system development agreement	1.18

23. FINANCIAL INSTRUMENTS

Capital maintenance

The Group's objective in the management of capital is to maintain the ability to run the operation and generate the return to equity holder and for the benefit of other shareholders, and to maintain proper equity structure to reduce the cost of capital.

The Group may adjust dividend payment policy to equity holder, return capital to equity holder, issue new equity, or sell assets to reduce debt burden in order to maintain its capital structure.

Foreign exchange risk

The Group's exposure to foreign currency risk relate primarily to the purchase of major raw materials and sales of goods which are denominated in foreign currencies, primarily US Dollars and Euro. The Group's management believes that foreign exchange rate risk will have no material effect to their operational results as they use forward currency contracts to hedge such risk as necessary and appropriate. Including foreign exchange risk management by using foreign currency received from a customer for goods purchase payment to a foreign supplier in the same currency (Natural Hedge).

Credit risk

Credit risk is the risk that a counter-party is unable or unwilling to meet a commitment that it entered into with the Group. The risk is controlled by the application of credit approvals from time to time and monitoring procedures.

The carrying amount of accounts receivable recorded in the statements of financial position net of allowance for expected credit losses of trade receivables accounts represents the maximum exposure to credit risk.

Interest rate risk

Interest rate risk arises from the fluctuation of market interest rates, which may impact current and future operations of the Group. The Group is exposed to interest rate risk related primarily to its deposits at financial institutions, investment in restricted fixed deposits, Long-term loans to subsidiary, short-term borrowings from related person. However, most of the Group's financial assets and liabilities bear floating interest rates or fixed interest rates which are close to the market rates. As such, the management considers the interest rate risk as minimal. Hence, the Group has no hedging agreement to protect against such risk.

Duty and Responsibility of company's secretary

The company's secretary shall perform duties as specified in Section 89/15, and Section 89/16 of the Securities and Exchange Act (No. 4) B.E. 2551 (2008), effective from 31st August 2008, responsibly, carefully and honestly. The secretary shall comply with laws, objectives, articles of association, resolutions of the board, as well as resolutions of the shareholder's meeting. Nevertheless, the legal duties of the company's secretary are as follows.

1. Provide and maintain following documents
 - Director register
 - Letter of appointment for board meeting, minutes of the board meeting and annual reports of the company.
 - Letter of appointment for shareholder's meeting and minutes of the shareholder's meeting.
2. Maintain a report of interest provided by the board of directors, or executives, and submit a copy of the report of interest according to Section 89/14 to the committee chairman, and the audit chairman within 7 working days from the date the company receives such report.
3. Take other operations as specified by the Capital Market Supervisory Board

Furthermore, the company's secretary also has other obligations as follows

- Give advice, coordinate and follow up the board of directors to comply with objectives, the articles of association, the board's resolution and the shareholders' resolution, legal requirements, and any related principles.
- Perform duty to arrange a board meeting and a shareholders' meeting
- Provide an orientation and give advice to newly appointed directors.
- Give suggestion about necessary training courses suitable for the board.
- Contact and coordinate with the company's internal units to comply with the resolution of the board of directors, and the shareholder's meeting, and report information to supervisory sectors and public correctly and legally.
- Take care of the company to treat all shareholders equally and fairly in accordance with legal provisions and promote good relationship with minor shareholders.
- Be an intermediary in coordination of matters between shareholders, directors, executives, as well as all stakeholders.
- Perform other duties as assigned by the company

Attachment 3 : Detail about internal audit head and compliance head**1) Head of internal audit**

Mr. Niran Kongto assumed the position. He was appointed by the Audit Committee Meeting No. 2/2023 on Wednesday, May 10, 2023 because he has at least 12 years of experience working in auditing within private organizations, as well as having received training to increase skills and knowledge from the Association of Internal Auditors of Thailand and the Federation of Accounting Professions. In the course of internal audit, risk management, internal control, and understanding of the Company's activities and operations, it was deemed appropriate to perform such duties adequately, and at the Audit Committee Meeting No. 9/2022 held on Wednesday, December 21, 2022, it was resolved to appoint Ascent Advisory Company Limited to perform the duties of the Company's internal auditor. The reason for the increase in service fees for system audit work from the previous year is due to the economic situation and the rising cost of living. The assessment of the adequacy of the internal control system according to the COSO 2013 framework is the same as the previous year because it is a continuous assessment, provided that the service fee is within the budget for the year 2023 that has been approved by the authority and does not exceed the budget and does not exceed the budget..

The audit plan for 2022 of the internal auditor from Ascent Advisory Co., Ltd is as follows

Audit Issues in Quarter 1/2022 are summarized below.

- Sales and payment system
- Product delivery system
- Follow up on the remaining issues from the last quarter report

Audit Issues in Quarter 2/2022 are summarized below.

- Quality Management Systems and Quality Systems
- Maintenance System
- Payment System
- Follow up on the remaining issues from the last quarter report

Audit Issues in Quarter 3/2022 are summarized below.

- Information technology system

- Human Resource Management System
- Follow up on the remaining issues from the last quarter report

Audit Issues in Quarter 4/2022 are summarized below.

- Budget management system
- Financial report system
- Follow up on the remaining issues from the last quarter report

2) Head of Compliance Department

Attachment 4 : properties for business operation

It is reported in part 1 (“Topic 4: proeprties for business operation”)

Attachment 5 : Corporate governance and business ethic policy**Announcement of the board of directors****No. ST07 / 2565****Poon Corporate Governanec Policy**
-----**1. Background**

SHUN THAI RUBBER GLOVES INDUSTRY CO., LTD. believes that the good corporate governance process will help the company to manage operations effectively, efficiently, transparently, and traceably and to uplift the company's overall operation, which will bring confidence and trust to shareholders, stakeholders, and all related parties. It also helps the compant to succeed and achieve important goals of the company for stakeholders in the value chain to grow and prosper sustainably. Therefore, the company defines a policy of corporate governance as a guideline and framework of operations of the company in accpordance with the official guideline of the supervisory section and Sustainable Development Goals: SDGs of the United Nation associated with United Nations Guiding Principles on Business and Human Rights – UNGPs).

2. Corporate governance policy and goal

SHUN THAI RUBBER GLOVES INDUSTRY CO., LTD. realizes importance of good corporate governance, which is a main factor to bring fairness to stakeholders, promote the company's operations effectively for sustainable growth and sustainability of stakeholders in the value chain. The company thus promotes th company's operations to be consistent with the principle of good corporate governance with following goals.

- 2.1 To be competitive with good overall operation, and regard to long-term impacts.
- 2.2 To operate the business ethically, and respect rights and take responsibility for all stakeholders in the value chain.
- 2.3 To be socially and environmentally friendly
- 2.4 To adapt under factors of changes.

3. Stakeholders in the value chain

3.1 Shareholders and investors

The Company realizes legal right of shareholders by protecting rights and facilitating the shareholders regarding any right exercising. This includes to ensure that such rights are well protected and treated. The company will not take any actions that violate or deprive rights of the shareholders, by setting the principle and code of practice as follows.

3.1.1 The company will take care of shareholders to be suitably and well treated under law.

3.1.2 The company will maintain basic rights for shareholders such as

1) Right to trade or transfer shares and have shares bought back by the company equally.

2) Right to have share in the company's profit equally.

3) Right to receive news and information of the business adequately

4) Right to attend a meeting to make a vote in meetings for resolution as follows

(1) Nominate, appoint or discharge a director so that shareholders are given a chance to select a director as they wish.

(2) Appoint an auditor

(3) Allocate dividend

(4) Determine or revise the articles and memorandum of association

(5) Decrease or increase capital

(6) Approve special matters

(7) Other matters affecting the company as specified by law etc.

3.1.3 The company will facilitate and promote all shareholders to attend a shareholders' meeting by delivering an invitation to the shareholders' meeting identifying related information along with relevant documents.

3.1.4 The company will provide a channel to communicate with shareholders, and investors to give information and clear all questions.

3.1.5 Shareholder's meeting

- 1) The company will allow shareholders to know the principle and method of attending a meeting.
- 2) The company will inform the shareholders of any information adequate to consideration in each agenda before the meeting in a timely manner.
- 3) The company will give a chance to shareholders to ask the directors in the meeting or send questions in advance.
- 4) Provision of meeting minutes and disclosure of resolutions in the shareholder's meeting

Fair treatment to shareholders

The company realizes ownership of all shareholders, including executive and non-executive shareholders as well as foreign shareholders. The company will treat all shareholders fairly and equally, and thus determine the principle and code of practice as follows.

- 3.1.6 The company will supervise shareholders to be treated and protected for basic rights as mentioned in clause 2.1 equally.
- 3.1.7 The company will provide a process of shareholder's meeting that supports fair treatment to all shareholders.
- 3.1.8 The company will give an opportunity to minor shareholders to nominate a person to be a director in advance in a timely manner.
- 3.1.9 The company gives a chance to shareholders who are unable to attend the meeting to exercise voting right by giving a proxy to attend the meeting and make a vote in lieu.
- 3.1.10 The company allows minor shareholders to propose a meeting agenda in advance before the shareholder's meeting date.
- 3.1.11 The company will provide a preventive measure in case the directors and executives perform Abusive self-dealing which is to take advantages from other shareholders such as Insider trading, disclosure of internal information to those who are related to the directors and executives, which may cause damages to the shareholders etc.

3.1.12 The company will render directors and executives to disclose information about interest of themselves and relevant people so that the committee will be able to consider whether the company's transactions are subject to a conflict of interest or not and to make a decision for overall benefit of the company. However, the directors and executives who have interest in any transaction of the company will not be involved with decision on such transaction.

3.2 Stakeholders in the value chain

The stakeholders play an important role in the company. The company provides a system to supervise stakeholders including customers, creditors, debtors, trade partners, employees and the company where the company is situated, the society, government sector, and other stakeholders such as competitors, and auditors etc. The company determines the principle and code of practice as follows.

- 3.1.13 The company will treat each group of stakeholders by recognizing rights of such stakeholders according to applicable laws or an agreement with the company.
- 3.1.14 The company will not take any action that violates rights of such stakeholders.
- 3.1.15 The company will define a compensation measure in case stakeholders are damaged by right violation.
- 3.1.16 The company will develop mechanism of participation of stakeholders in enhancing the company's overall operation to stabilize the business sustainably.
- 3.1.17 The company will disclose important information to stakeholders sufficiently in order that they participate in above activities effectively.
- 3.1.18 The company will provide a measure of whistleblowing for the board in an issue of legal offence, inaccuracy of financial report, defected internal control, or misconduct. The whistleblowers will be properly protected.
- 3.1.19 Th company will be socially responsible especially for matters directly affecting the business operation so that related persons are confident that the company's operation is environmentally and socially recognized for sustainable development.

4. Data disclosure and transparency

The company realizes importance of disclosing information in support of decision of shareholders or investors and stakeholders, as well as financial data and non-financial data according to the requirement correctly, completely, punctually, and transparently through easily accessible channel with equality and reliability. The principle and code of practice is as follows.

- 4.1 The company will provide a report of overall performance in former year of the board and subcommittees, and compliance with policies.
- 4.2 The company will provide a reliable, correct, valid, and quality reporting system to ensure the shareholders and outsiders that the information presented in the financial report is correct meeting the generally accepted accounting standard, and passing the audit by an independent auditor.
- 4.3 The company will provide a member to take responsibility for giving information, news, publication, and answering inquiry of shareholders, investors and outsiders, and he/she will perform the duty carefully and cautiously.
- 4.4 The company will provide a responsible unit or sector called as “**investor relation**” to communicate with outsiders such as shareholders, institutional investors, general investors, analysts, and related government authorities fairly and equally.
- 4.5 The company allows people to meet the company’s executives suitably under the condition that given information is already public.

5. Responsibility of the board of directors

The board of directors plays an important role in supervising the business for highest benefits of the company and maintaining sustainable growth and prosperity for all stakeholders in the value chain with carefulness and cautiousness. The company thus defines the principle and code of practice as follows.

- 5.1 The committee should have good leadership, and be visionary and independent when making a decision for highest benefits of the company and all stakeholders.
- 5.2 The committee will provide clear division of duty and responsibility between the board and the management.

- 5.3 The committee will take care of the company to have a work system that ensures the company's activities legally and ethically performed.
- 5.4 The committee comprises directors with different qualification regarding skills, experiences, aptitudes that benefit the company, and who dedicate time and effort in duty performance to promote the company to have the strong committee.
- 5.5 The recruitment process for company's directors will be performed in the shareholder's meeting for transparent result with no influence of controlling shareholders or the management, and to bring confidence to outsiders.
- 5.6 The committee should provide subcommittees to study and screen works as necessary especially for cases that require neutrality in diagnosis, and define policies, roles, duties and responsibilities as well as work processes such as meeting arrangement and clear report to the board etc.
- 5.7 The committee should understand duty and responsibility of directors and business operation of the company, and freely give their opinions.
- 5.8 The committee should improve themselves to keep updated all the time.
- 5.9 The committee shall perform duty with honesty, carefulness and cautiousness by recognizing highest benefits of the company, and fairness to all shareholders and stakeholders who will receive correct and complete information. The committee should dedicate their time in performing duties with full responsibility, and the directors are obliged to attend every board meeting except for cases with special reasons.
- 5.10 The committee will not approve remuneration of their own, but will provide a transparent remuneration process that requires approval from shareholders. The level and component of remuneration should be suitable, and adequate that can motivate and retain quality directors as needed to avoid excessive return payment.

This announcement is effective from 30th March 2022 and onwards.

(Mr. Chakan Sangraksawong)

Committee Chairman

SHUN THAI RUBBER GLOVES INDUSTRY CO., LTD.

Attachment 6 : Report from the audit committee

Attn: shareholders

SHUN THAI RUBBER GLOVES INDUSTRY CO., LTD.

The audit committee of SHUN THAI RUBBER GLOVES INDUSTRY CO., LTD. contain 3 independent directors who are skilled in finance, accounting, laws and management, and fully qualified according to the requirements of the Office of Securities and Exchange Commission, and the Stock Exchange of Thailand. They are independent in performing duties according to the charter of the audit committee, and the directors are as follows.

1. Mr. Teerawit Tanakijsoonthon Chairman of the audit committee and independent director
2. Dr. Chakan Saengraksawong Audit director and independent director
3. Mr. Chatchawan Settalak Audit director and independent director

The internal audit manager acts as the secretary of the audit committee.

The audit committee performs duties and responsibilities according to the charter of the audit committee. In 2023, the audit committee arranged 5 meetings, and the essence of duty performance can be summarized as follows.

- **Financial report audit**

The audit committee audits and considers the financial report on a quarterly basis. In financial year 2022, the company and subsidiary along with the company's auditor and related executives explained and asked about accuracy and validity, the important accounting policy, improvement of accounting particulars, that affect the financial statement, adequate disclosure and independence of the auditor, presented to the board of directors. This is to ensure that the company provides a correct financial statement according to the financial reporting standard. The audit committee realized that the financial statement of the company ending as of 31st December 2023, has been audited by the company's auditor, and presented the financial position and overall operation of the company correctly and completely as it should be. Furthermore, data in the financial statement were sufficiently disclosed, which benefited investors and the financial statement users.

- **Internal control and internal audit**

The audit committee has reviewed the internal control and internal audit system inside the company, and given comments on the sufficiency assessment of the internal control and the internal audit system to be suitable for business operation. This includes supporting the internal audit sector and internal auditors to be independent in directly reporting to the audit committee, reviewing and approving the annual audit plan together with the internal auditors in order that the work operation is in accordance with the approved annual audit plan. Furthermore, the overall operation is followed up for correction according to the internal audit plan in subject matters, and the budget is provided to support plan-based operations. In this regard, the audit result in 2023 of the internal auditor reflects that the management improves the internal control system as per important suggestion from the internal auditor. This will ensure that the company has adequate, suitable and effective internal control system.

- **Risk management audit**

The board of directors realizes importance of the organizational risk management and reviews the risk management guideline to be consistent with current situation of the business to always be effective and efficient. The risk management committee and the management are assigned to provide the organization risk management that may affect the business operation, and to provide a risk management plan. Nevertheless, the audit committee communicates with the risk management committee to follow up the review of risk management effectively through the internal control and internal audit system.

- **Transaction and related matter audit**

The audit committee realizes importance of auditing transactions and related matters as well as items that may cause conflict of interest of the company and subsidiary to be in accordance with the notification of the stock exchange of Thailand commission, and the securities and exchange commission. There is a comment that during 2023, the company followed the general trade conditions fairly, reasonably with highest benefits to the company. The audit committee also emphasizes the non-competition policy of directors and conflict of interest prevention policy at director, executive and employee levels continuously.

- **Good corporate governance**

The audit committee has reviewed the compliance with securities and exchange laws, the requirement of the Stock Exchange of Thailand, and other laws related to business operation of the company. The audit committee agrees that in 2023, the company fully complied with the securities and exchange law, the requirement of the Stock Exchange of Thailand, and laws applicable to the company.

- **Considering appointment of the auditor and remuneration payment**

The audit committee considers selecting the auditor and determining return by considering from qualification of the auditor, knowledge, competency, reliability, independence, and experience of auditing as well as audit cost and performance in previous year. He/she should be qualified as specified by the office of Securities and Exchange Commission. It is resolved to present to the board of directors for considering approval from the general shareholder's meeting.

In summary, the audit committee applies knowledge, ability, carefulness, and independence in performing duties and responsibilities identified in the charter of the audit committee. The audit committee agrees that the company provides the financial report correctly and reliably, and the data disclosure is sufficient with good corporate governance, and strict compliance with applicable laws.
